Overview

UL has partnered with clients in a variety of industries for the past 30 years to provide training and services to build strong learning programs.

We currently maintain over 1,000 online e-learning courses that are written and reviewed by recognized subject matter experts, including the US FDA. In fact, more than one million industry professionals, have completed tens of millions of courses since 2003.

Courses are regularly updated to reflect the most current expectations and requirements of regulators and industry groups. Our global quality and compliance management methodology has resulted in measurable performance and compliance improvements. Our e-learning philosophy is based on Mastery Learning, which has been proven to improve retention and change behavior in adult learners through methods that include interaction with dynamic content and built-in assessments.

Should your organization have unique training requirements, you can rely on our Content Solutions team, which develops thousands of courses each year for our clients. Our team shares best practices as it relates to instructional design and multi-media, such as incorporating your organization's unique content and branding into our standard courses or new custom courses.

Courses are accessible on tablets and other mobile devices and can be translated into almost any language. Courses can be hosted independently on your own LMS, or you can take advantage of UL's industry standard LMS offerings. Learn more about UL's courses and additional solutions at ulehss.com.

Selections:

Libraries: Safety Catalog | **Languages:** English |

15-Passenger Van Safety (US)

PS5-00258

Driving a van is not like driving a car. 15-passenger vans are more susceptible to rollovers, blind spots, weight distribution issues and special handling requirements. Take this course to learn the things you need to know about driving a 15-passenger van so you can prevent avoidable collisions and injuries. Make sure you and your passengers reach your destination. Learners include 15-passenger van drivers.

Languages Available:
English

Format: eLearning - Claro

Libraries:
• Safety Catalog

Topic/Industry:
• Transportation Safety

Course Objectives:

Differences between driving a 15-passenger van and driving a car;Effective driving preparation strategies to maximize safety;Safe van-driving techniques;Procedures to safely conclude a trip

Runtime: 31

Access to Medical and Exposure Records for Employees (US)

PS5-100747

The law requires your employer to provide you with access to your medical and exposure records. Why should you care? How do you get access? Take this course to find out! This course is ideal for all employees.

Languages Available:
English

Format: eLearning - Claro

Libraries:
• Safety Catalog
• EHS for Life Science - Basics Library
• Medical Device Catalog
• Pharmaceutical Catalog

Topic/Industry:
• Awareness
• Employment Liability

Course Objectives:

Why medical and exposure records are useful;How to access records;Your rights regarding records and access

Runtime: 5

Access to Medical and Exposure Records for Managers (US)

PS5-102801

Federal law provides employees with the basic right to know the extent and consequences of their exposure to the harmful substances with which they work. They are entitled to access to all the medical and exposure records generated for them while working for a given employer. Take this course to learn about employee rights, how to provide access to records and what information is exempt from employee access. This course is ideal for supervisors and other employees who receive and process record requests in the United States.

Languages Available:
Spanish (Latin America) (PS5-102922)
English

Format: eLearning - Claro

Libraries:
• Safety Catalog

Topic/Industry:
• Employment Liability

Course Objectives:

Know what is included in each of the three types of records: medical, exposure and record analyses;Recall employer requirements for retaining records and informing employees;Know how to provide employees with access to records;Know how to provide medical and exposure information when there are no records available;Recall how to handle trade secrets in records

Runtime: 14

Accident and Breakdown Procedures (US)

PS5-01306

Breakdowns and accidents are unplanned events. You never know if, when, where, or how they will happen. But every time you get behind the wheel, you need to be prepared for the worst. The purpose of this course is to make you more prepared in the event of an accident or breakdown.

Languages Available:
English

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- General Safety and Manufacturing

Content Suite:

- Commercial Drivers Suite (IACET CEU=0.4)

Course Objectives:

Distinguish between accidents and incidents; Assemble and use an incident response kit; Recognize the importance of complying with company procedures; Protect the accident or breakdown area to prevent further incidents; Describe what to do immediately following an accident

Runtime: 18

Active Shooter: Law Enforcement

PS5-100404

When an active shooter is in a workplace, people depend on law enforcement to stop the threat. Take this course to learn what to expect from law enforcement officers and what YOU can do to ensure they can do their jobs. This course is ideal for all employees.

Languages Available:
French (Canadian) (PS5-100815)
Spanish (Latin America) (PS5-100816)
English

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- Employment Liability

Content Suite:

- Active Shooter: Preparation and Response Suite (IACET CEU=0.1)
- Active Shooter: Preparation and Response Suite

Course Objectives:

By the end of this course, you will know how to respond to law enforcement officers at an active shooting scene.

Runtime: 9

Active Shooter: Prevention and Preparation

PS5-100087

Sadly, we have all seen news reports about people who have entered a place of business or school and started shooting others. Do you know the signs that someone may become violent? Do you have a plan in case there is a shooting at your workplace? Take this course to learn how to prevent and prepare for active shooters. This course is ideal for all employees.

Languages Available:
English
French (Canadian) (PS5-100813)
Spanish (Latin America)

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- Employment Liability

Content Suite:

- Active Shooter: Preparation and Response Suite (IACET CEU=0.1)
- Active Shooter: Preparation and Response Suite

Course Objectives:

By the end of this course, you will be able to recognize the warning signs that someone may be prone to violence and identify what you can do NOW to prepare for an incident involving an active shooter.

Runtime: 12

Active Shooter: Run, Hide, Fight

PS5-100403

If an active shooter came into YOUR workplace, would you know what to do to survive? Take this course to learn how to make life-or-death decisions about running, hiding or fighting to survive. This course is ideal for all employees.

Languages Available:
French (Canadian) (PS5-100817)
Spanish (Latin America) (PS5-100818)
English

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- Employment Liability

Content Suite:

- Active Shooter: Preparation and Response Suite (IACET CEU=0.1)
- Active Shooter: Preparation and Response Suite
- Working from Home Suite

Course Objectives:

By the end of this course, you will be able to decide what to do during an active shooter incident.

Runtime: 17

Active Shooter: Victims

PS5-100405

If there is an active shooter in your workplace, emergency response professionals may not be able to get to victims immediately. In these cases, you may be able to help keep people alive until help arrives. Take this course to learn what YOU can do! This course is ideal for all employees.

Languages Available:
French (Canadian) (PS5-100819)
Spanish (Latin America) (PS5-100820)
English

Format: eLearning - Claro

- Libraries:**
 - Safety Catalog
- Topic/Industry:**
 - Employment Liability

- Content Suite:**
- Active Shooter: Preparation and Response Suite (IACET CEU=0.1)
 - Active Shooter: Preparation and Response Suite

Course Objectives:
By the end of this course, you will know how to assess and assist active shooter victims.

Runtime: 9

Aerial and Scissor Lifts

Not everything we have to work on is within reach. There are times we need a little help. Sometimes ladders are chosen, other times fixed scaffolds, and still other times mobile equipment like aerial lifts (also referred to as an articulating boom/bucket lifts) and scissor lifts. Working safely with this last category will be the focus of this course. Ideal learners include employees who work on or around aerial lifts and scissor lifts.

Format: eLearning - Claro

- Libraries:
- Topic/Industry:
- Safety Catalog
 - General Safety and Manufacturing

- Content Suite:
- Advanced Safety Orientation for Construction Industry (IACET CEU=0.9)
 - Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7)
 - OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored)
 - OSHA 30: Construction Outreach Training Course (IACET CEU=3.0)
 - OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored)
 - OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0)

Course Objectives:

Identify different types of mobile equipment to use when your work is out of reach;Explain the importance of lift and site inspection before use;Recognize causes of falls from mobile equipment;Describe precautions to help prevent falls, tip-over and catapulting;Identify hazards such as contact with power lines or other moving equipment

Runtime: 23

PS5-00572

- Languages Available:
- Dutch (PS5-101735)

Ammonia Awareness

PS5-102771

Ammonia can cause blindness, lung damage and death, but the good news is you can control your exposure to it. Take this course to learn how to safely identify, store and handle ammonia. You will also learn what to do in the event of an ammonia exposure or leak. This course is ideal for anyone who works with or near ammonia.

Languages Available:
English

Format: eLearning - Claro

- Libraries:
- Topic/Industry:
- Safety Catalog
 - Awareness
 - General Safety and Manufacturing

Course Objectives:
Recognize when ammonia may be present;Know the hazards associated with ammonia;Recall safe practices for handling and storing ammonia;Know what to do during emergencies involving ammonia

Runtime: 11

Applying Electrical Standards (US)

PS5-00262

Electrical standards do not just help you comply with the law, they keep you safe! You are already familiar with electrical terms and hazards. Take this course to learn about NFPA 70E and what it means for you. Stay compliant and stay safe! Ideal learners are people in all industries, particularly supervisors, electrical workers and safety managers.

Languages Available:
French (Canadian) (PS5-102324)
Spanish (Latin America) (PS5-102224)
English

Format: eLearning - Claro

- Libraries:
- Topic/Industry:
- Safety Catalog
 - General Safety and Manufacturing
 - EHS for Life Science - Basics Library
 - Health and Safety Management
 - Medical Device Catalog
 - Pharmaceutical Catalog

Course Objectives:
Recognize the consequences of not following electrical standards;Recall the OSHA and consensus standards that apply to electrical work;Identify NFPA 70E training requirements for qualified and unqualified workers;Use NFPA 70E tables to determine safe approach boundaries, PPE categories for specific tasks and required PPE

Runtime: 25

Arsenic Awareness (US)

PS5-00781

OSHA requires inorganic arsenic training whenever employees are exposed to arsenic at or above a certain level. This course explains the possible health effects related to inorganic arsenic and how to reduce and/or eliminate the exposures that can lead to these health effects.

Languages Available:
English

Format: eLearning - Claro

- Libraries:
- Topic/Industry:
- Safety Catalog
 - Awareness
 - General Safety and Manufacturing

Course Objectives:
Health hazards of arsenic;Permissible exposure limit (PEL);Personal protective equipment (PPE);The location of regulated areas;Signs and labels;Hygiene facilities;Engineering controls;Medical surveillance;Housekeeping

Runtime: 12

Asbestos Hazards Introduction (US)

PS5-01441

This introductory course will provide Class III and Class IV asbestos workers with an introduction to a three-part series of courses that will teach asbestos hazards and applicable federal regulations for each asbestos work classification. This introductory course will demonstrate how to identify asbestos hazards as well as how to prevent and control asbestos exposure.

Languages Available:
English

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- General Safety and Manufacturing
- Construction

Content Suite:

- Asbestos Awareness
Intro, Parts 1-3 (IACET
CEU=0.2)
- Asbestos Hazards Intro,
Parts 1-3 (US)
- Advanced Safety
Orientation for
Managers and
Supervisors in
Construction (IACET
CEU=2.7)
- OSHA 30: Construction
Outreach Training
Course (IACET
CEU=3.0)
- OSHA 30: Construction
Outreach Training
Course (IACET
CEU=3.0) (Actively
Proctored)

Course Objectives:

Identify the three-part course structure and purpose; Recall asbestos work classifications; State the intended audience for this training

Runtime: 4

Asbestos Hazards Part 1 (US)

PS5-01443**Languages Available:**

English

This is Part 1 and a continuation of Asbestos Hazards Introduction and will provide Class III and Class IV asbestos workers with the knowledge and skills necessary to identify asbestos hazards, the nature of operations that could result in exposure to asbestos, and the importance of necessary protective controls. This course describes the health effects of asbestos and where it is commonly found. In addition, workers will learn ways to prevent exposure and the importance of respiratory protection.

Format: eLearning - Claro**Libraries:**

- Safety Catalog

Topic/Industry:

- General Safety and Manufacturing
- Construction

Content Suite:

- Asbestos Awareness
Intro, Parts 1-3 (IACET
CEU=0.2)
- Asbestos Hazards Intro,
Parts 1-3 (US)
- Advanced Safety
Orientation for
Managers and
Supervisors in
Construction (IACET
CEU=2.7)
- OSHA 30: Construction
Outreach Training
Course (IACET
CEU=3.0)
- OSHA 30: Construction
Outreach Training
Course (IACET
CEU=3.0) (Actively
Proctored)

Course Objectives:

Recognize asbestos;Identify where it is commonly found;Recognize operations that could result in asbestos exposure;Describe the potential health effects of exposure to asbestos;Cite common precautions and work practices that should be taken to avoid exposure

Runtime: 38

Asbestos Hazards Part 2 (US)

PS5-01444**Languages Available:**

English

This is Part 2 of a three-part training course designed to provide Class III and Class IV asbestos workers with the knowledge and skills necessary to identify asbestos hazards, the nature of operations that could result in exposure to asbestos, and the importance of necessary protective controls. Part 2 will outline the precautionary measures to take to reduce or eliminate asbestos exposure.

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- General Safety and Manufacturing
- Construction

Content Suite:

- Asbestos Awareness
Intro, Parts 1-3 (IACET
CEU=0.2)
- Asbestos Hazards Intro,
Parts 1-3 (US)
- Advanced Safety
Orientation for
Managers and
Supervisors in
Construction (IACET

- OSHA 30: Construction
Outreach Training
Course (IACET
CEU=3.0)
- OSHA 30: Construction
Outreach Training
Course (IACET
CEU=3.0) (Actively
Proctored)

Course Objectives:

Define the permissible exposure limit for asbestos;Describe monitoring and medical surveillance programs relating to asbestos exposure;Identify proper engineering controls and work practices to reduce asbestos exposure;Identify appropriate personal protective equipment;Describe response procedures for asbestos releases

Runtime: 28

Asbestos Hazards Part 3 (US)

PS5-01445

Languages Available:
English

This is Part 3 of a three-part training course designed to provide Class III and Class IV asbestos workers with the knowledge and skills necessary to identify asbestos hazards, the nature of operations that could result in exposure to asbestos, and the importance of necessary protective controls. Part 3 will provide an overview of various types of respirators, their limitations, and how to properly put on and take off a respirator.

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- General Safety and Manufacturing
- Construction

Content Suite:

- Asbestos Awareness
Intro, Parts 1-3 (IACET
CEU=0.2)

- OSHA 30: Construction
Outreach Training
Course (IACET
CEU=3.0)
- OSHA 30: Construction
Outreach Training
Course (IACET
CEU=3.0) (Actively
Proctored)

Course Objectives:

Describe the basic requirements of the Respiratory Protection Standard;Identify capabilities and limitations of SCBA, airline and air-purifying respirators;Identify proper maintenance practices including inspecting, cleaning, and storing your respirator;Recognize signs of respirator failure

Runtime: 19

Avoiding Rear-End Collisions - Large Vehicles (US)

PS5-01375

Languages Available:
English

Rear-end collisions can be very serious since the vehicle that is struck from behind is usually stopped or moving very slowly. The potential for catastrophe is even greater when the vehicle in motion is a large truck and the vehicle that is struck is a smaller vehicle such as an automobile. This course focuses on the common causes of rear-end collisions and what drivers of large vehicles can do to reduce the risk of being involved in such a collision.

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- Transportation Safety

Course Objectives:

List the six major factors that contribute to rear-end collisions;State what you can do to avoid colliding with a vehicle in front of you;Describe how you can reduce the risk of another vehicle colliding with yours from the rear

Runtime: 26

Avoiding Rear-End Collisions - Light Vehicles (US)

PS5-01374

Languages Available:
English

Rear-end collisions can be very serious since the vehicle that is struck from behind is usually stopped or moving very slowly while the other vehicle is in motion. The potential for catastrophe is amplified when the vehicle in motion is a van or truck and the vehicle that is struck is a smaller vehicle such as an automobile. This course focuses on the common causes of rear-end collisions and what drivers of light commercial vehicles can do to reduce their risk of being involved in such a collision.

Format: eLearning - Claro

- Libraries:
- Topic/Industry:
- Safety Catalog
 - Transportation Safety

Course Objectives:

Six major factors that contribute to rear-end collisions;How to avoid colliding with a vehicle;How to reduce the risk of another vehicle colliding from the rear

Runtime: 25

Back Injury Awareness

PS5-102378

Languages Available:
English

Back ailments are painful. They can be debilitating, and may prevent you from working and enjoying activities outside of work. This course will help you become aware of what you can do to prevent back injuries. Ideal learners include all employees.

Format: eLearning - Claro

- Libraries:
- Topic/Industry:
- Safety Catalog
 - Awareness
 - General Safety and Manufacturing

Course Objectives:

Recognize the risk factors that increase your chance of sustaining a back injury;Recall how poor posture can lead to back injuries;Identify the best ways to prevent a back injury;List the steps you should take if a back injury occurs in the workplace.

Runtime: 12

Basic Rigging Awareness

PS5-01208

This basic rigging awareness module addresses the core elements that workers need to understand to conduct their rigging operations in a safe manner. Employers can use this course to ingrain fundamental terms and employee responsibilities. This course is an excellent tool for organizations who want to bolster or supplement their current rigging training program.

Languages Available:
Spanish (Latin America) (PS5-102203)
English

Format: eLearning - Claro

- Libraries:**
 - Safety Catalog
- Topic/Industry:**
 - Awareness
 - Construction

- Content Suite:**
- Advanced Safety Orientation for Construction Industry (IACET CEU=0.9)
 - OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored)
 - OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0)

Course Objectives:
Recognize how to inspect, care for and store rigging equipment;Identify safe methods to prepare for a rigging job

Runtime: 9

Basic Rigging Principles Part 1 (US)

PS5-00192

Languages Available:

English

Rigging is a process used to secure materials to be moved by cranes, hoists or other lifting equipment. There are many factors to consider when applying slings and chains to secure a load. Improper rigging can lead to dropped loads and catastrophic failure of lifting equipment, which can cost lives. This course will describe rigging equipment and how to care for, inspect and store it.

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- General Safety and Manufacturing

Content Suite:

- Basic Rigging Principles, Parts 1-2 (US)
- Crane Safety and Basic Rigging Training Suite (IACET CEU=0.3)
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored)

Course Objectives:

Recognize equipment used to rig loads;Identify the function of different pieces of rigging equipment;Recall how to inspect different pieces of rigging equipment;Recall storage requirements for rigging equipment

Runtime: 43

Basic Rigging Principles Part 2 (US)

PS5-00193

Languages Available:
English

Rigging is a process used to secure materials to be moved by cranes, hoists or other lifting equipment. There are many factors to consider when applying slings and chains to secure a load. Improper rigging can lead to dropped loads and catastrophic failure of lifting equipment, which can cost lives. This course will cover the steps required to prepare for safe rigging.

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- General Safety and Manufacturing

Content Suite:

- Basic Rigging Principles, Parts 1-2 (US)
- Crane Safety and Basic Rigging Training Suite (IACET CEU=0.3)
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored)

Course Objectives:

Recall the general safety rules to be observed while rigging;List the four steps required to plan a rigging job;Explain how to safely prepare for rigging;Recognize how to safely mount equipment on a load

Runtime: 20

Battery and Charger Safety (US)

PS5-00723

Languages Available:
English

Batteries provide electric power for equipment like forklifts, narrow-aisle trucks, airport vehicles, electric buses, autos and golf carts. When used properly, batteries are a safe and reliable source of power. As with any power source, there are some hazards. This lesson covers these hazards, including electrical shock, corrosive chemical exposure and battery handling.

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- General Safety and Manufacturing

Course Objectives:

How a battery and charger work;Battery handling, recharging, watering and cleaning;Personal safe practices;Acid spill clean-up;Simple exterior repair

Runtime: 20

Bench Grinder Safety

A jagged wheel fragment can fly fast enough to penetrate the soft tissue of your neck, eyes and face. Bench grinders are powerful tools that require precision and precaution. This course will explain the steps you must take to stay safe when working with these commonly used pieces of equipment. Ideal learners are maintenance employees in general industry, employees in the construction industry, and supervisors of those employees.

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- General Safety and Manufacturing

Content Suite:

- Advanced Safety
Orientation for
Managers and
Supervisors in
Construction (IACET
CEU=2.7)
- OSHA 30: Construction
Outreach Training
Course (IACET
CEU=3.0)
- OSHA 30: Construction
Outreach Training
Course (IACET
CEU=3.0) (Actively
Proctored)

Course Objectives:

Recognize common causes of injury associated with bench grinders;Identify the main safety features of a bench grinder;Recall general precautions and tips for safe use;Order the steps to replace a grinding wheel

Runtime: 19

Benzene Safety (US)

Benzene is an aromatic hydrocarbon which is produced by the burning of natural products. It is found in gasoline and other fuels, and is used in the manufacture of plastics, detergents, pesticides, and other chemicals. Benzene is a clear, colorless liquid with a pleasant, sweet odor. The odor of benzene does not provide adequate warning of its hazard. In fact, benzene can cause serious health problems that you must understand if you work with it. This module covers the hazards of benzene and how to work safely with benzene.

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- General Safety and Manufacturing

Course Objectives:

Effects of overexposure to benzene;How exposure to benzene can occur;How to reduce the risk of exposure;Working safely with benzene;Emergency and first aid procedures in the event of exposure

Runtime: 16

PS5-00673

Languages Available:

French (Canadian) (PS5-103004)

Biosafety Hazardous Waste Handling and Disposal (US)

PS5-00525

Languages Available:
English

If you work with biological materials, it is quite possible that you will produce hazardous waste. What types of hazardous waste might you produce? The obvious answer is biohazardous, or medical, waste. But if you are like a lot of people who work with biological materials, you may also work with or around other hazardous chemicals and radioactive materials, which wind up as waste too. Ideal learners are workers who may be exposed to biohazardous waste.

Format: eLearning - Claro

Libraries:
• Safety Catalog

Topic/Industry:
• Laboratory Safety

Content Suite:
• Laboratory Safety
Training Suite (IACET
CEU=0.3)

Course Objectives:

Give a definition of hazardous waste;Describe your role in the hazardous waste management process;Discuss strategies and practices for hazardous waste minimization;List three methods of hazardous waste disposal;State what to do in the event that you find an unknown waste

Runtime: 31

Blasting Area Safety (US)

PS5-01186

Languages Available:
English

Blasting Area Safety creates an awareness of the activities that occur in a blasting area and describes the procedures of a typical blast sequence. This course is not designed for blasters or their crew, but is aimed at the other personnel that might be near a blasting site. The hazards of the site are discussed with the emphasis placed on flyrock, which is any material that travels beyond the boundary of the established blast area. The balance of the course discusses precautions taken at the site by the blaster-in-charge and the blasting crew, as well as precautions that non-blasting personnel should take.

Format: eLearning - Claro

Libraries:
• Safety Catalog

Topic/Industry:
• Construction

Content Suite:
• Advanced Safety
Orientation for
Managers and
Supervisors in
Construction (IACET
CEU=2.7)
• OSHA 30: Construction
Outreach Training
Course (IACET
CEU=3.0)
• OSHA 30: Construction
Outreach Training
Course (IACET
CEU=3.0) (Actively
Proctored)

Course Objectives:

Describe key terms used in blasting;Summarize important information about flyrock and other site;hazards associated with blasting;Specify general and personal precautions that reduce risk;associated with blasting areas

Runtime: 21

Blocking and Cribbing

PS5-102267

Languages Available:
English

A lot of work requires the use of lifting tools such as hydraulic jacks, cranes and truck hoists. Because these lifting tools are used so frequently and are usually reliable, you may forget that any lifting tool can potentially fail. However, if you happened to be under a load during such a failure, chances are you would be injured or killed. That is why raised equipment must be properly blocked or cribbed. This course is designed to teach general blocking and cribbing safety principles and demonstrate how those principles are applied. This course is ideal for anyone who works with heavy equipment or who performs blocking and cribbing.

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- Construction

Content Suite:

- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored)

Course Objectives:

Recognize the necessity for blocking and cribbing; Know how to select safe materials and equipment for blocking and cribbing; Identify general blocking and cribbing safety principles

Runtime: 13

Bloodborne Pathogens (BBP)

If your job duties include even occasional contact with blood or other infectious materials, you are at risk for contracting potentially deadly, incurable diseases. Take this course to learn what bloodborne pathogens are and how you can protect yourself from them. Ideal learners include anyone who may be exposed to blood or other potentially infectious materials, including healthcare workers, custodians, maintenance staff, research personnel and construction workers.

Format: eLearning - Claro

Libraries:

- Safety Catalog
- EHS for Life Science - Basics Library
- Medical Device Catalog
- Pharmaceutical Catalog

Topic/Industry:

- General Safety and Manufacturing

Content Suite:

- Advanced Safety Orientation for General Industry (IACET CEU=0.9)
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored)

- Portuguese (Brazil) (PS5-101177)
- Russian (PS5-102440)
- Spanish (Latin America) (PS5-100579)
- English

Course Objectives:

Know what bloodborne pathogens are;Recognize symptoms and treatments for hepatitis B, hepatitis C and the human immunodeficiency virus (HIV);Identify how bloodborne pathogens are transmitted;Remember to assume that all blood and other potentially infectious materials (OPIM) are contaminated and handle them accordingly;Recall safe handling procedures for blood and OPIM;Recall emergency procedures for blood or OPIM exposure

Runtime: 17

Bloodborne Pathogens Awareness

PS5-102406

Contact with blood or other infectious materials puts you at risk for contracting potentially deadly, incurable diseases. Take this course to learn what bloodborne pathogens are, the risk they present, and general steps you should take to ensure your protection after potential exposure. This course is not intended to teach universal precautions. You need additional information, vaccinations/immunizations, and PPE to provide first aid or handle/clean up BBP and OPIM. Ideal learners include all workers.

Languages Available:
English

Format: eLearning - Claro

Libraries:	Topic/Industry:

 - Reasonable Suspicion Training (US) Suite (IACET CEU=0.2)

Course Objectives:

Recall the properties of cannabis; Recognize how cannabis may affect users; Recall potential consequences of working while impaired; Know about strategies that may help employees avoid potential problems

Runtime: 15

Cardiopulmonary Resuscitation (CPR) Training (US)

PS5-00102

Incidents requiring CPR can happen anywhere and at any time. The first response to such an incident is the most important. CPR given at the scene can improve the chances of survival and recovery of a victim. This course will demonstrate how to recognize and respond to a severe life-threatening emergency until the Emergency Medical Services (EMS) personnel arrive.

Languages Available:
English

Format: eLearning - Claro

- Libraries:
- Topic/Industry:
- Safety Catalog
 - General Safety and Manufacturing

Course Objectives:

What a cardiac arrest is;How to correctly resuscitate a victim in cardiac arrest;Protecting oneself while helping a person in need;The basics of life support

Runtime: 22

Chemical Facility Security Awareness Training (US)

PS5-00555

What would happen if criminals or terrorists got their hands on potentially dangerous chemicals at your facility? What if they planted a bomb at your workplace? No one wants to experience the answers to these questions. Take this course to find out what you need to watch out for and what to do if you discover a security threat. Ideal learners are workers and managers in any facilities that use bulk quantities of highly hazardous chemicals.

Languages Available:
English
Spanish (Latin America) (PS5-101915)

Format: eLearning - Claro

Libraries: **Topic/Industry:**
• Safety Catalog • General Safety and Manufacturing

Course Objectives:

Recall their role in keeping their facilities secure;Recognize common chemical facility security risks;Identify ways to reduce chemical facility security risks;Know that increased threat levels require increased vigilance;Recall what to do when they notice a security risk

Runtime: 20

Chlorine Awareness

PS5-00686

Chlorine has a huge variety of uses. Its chemical properties make it an extremely effective disinfectant and an essential component in the chemical manufacture of literally thousands of vital products used every day. However, there are some hazards associated with chlorine and you need to know about them and how to protect yourself against them. This course presents information about the hazards of chlorine and how to handle it safely.

Languages Available:
English

Format: eLearning - Claro

Libraries: **Topic/Industry:**
• Safety Catalog • General Safety and Manufacturing

Course Objectives:

Identify the physical properties of chlorine;Recognize the health effects of chlorine exposure;Recall how to safely store and handle chlorine;Know appropriate response and first-aid measures for chlorine-related emergencies

Runtime: 9

Cleaning Up Small Chemical Spills (US)

PS5-00855

Spills in the workplace are almost inevitable. Because of the range and quantity of substances used in laboratories, manufacturing facilities and other work areas, preplanning is needed to respond safely to chemical spills. Spills should be cleaned up only by knowledgeable and experienced staff. This training will provide the information needed to handle small chemical spills in the workplace. Ideal learners are those who work around chemicals.

Languages Available:
English

Format: eLearning - Claro

Libraries: **Topic/Industry:**
• Safety Catalog • General Safety and Manufacturing

Course Objectives:

Define a small chemical spill;Explain how to prepare for and respond to a small chemical spill;List what should be included in a spill kit;Explain how to clean up a small chemical spill;Specify precautions to take if a chemical spill is large or involves hazardous materials;Describe what to do if someone becomes contaminated during spill cleanup;Recall how to dispose of spilled chemicals

Runtime: 14

Cold Stress

Cold stress is the loss of body heat to the environment. Low temperature, wind and wetness have a combined effect on the body to create cold stress, injuries and illness. Cold-related disorders such as hypothermia and frostbite can kill or injure workers. Employers and employees should be aware of cold stress hazards, cold-related disorders and how to treat and prevent them. Ideal learners are employees who may be exposed to cold temperatures.

Combustible Dust (US)

PS5-00251

Combustible dust is a very serious danger, and one that many people have never heard of. Any material that burns in a solid form can be explosive when in a finely divided form. This course provides a general understanding of the hazards, precautions, and potential consequences associated with combustible dust in the workplace. It will help learners recognize combustible dust hazards at their location and provide good housekeeping practices that will help minimize the likelihood of a fire or explosion in the workplace. This course does not provide technical information suitable to engineers who design, build, and maintain equipment and facilities. Ideal learners are all employees.

Runtime: 25

Compliance, Safety, Accountability (CSA) Overview for Drivers (US)

PS5-01341

In 2010, the Federal Motor Carrier Safety Administration (FMCSA) introduced new measures to improve the effectiveness of its compliance and enforcement program. The goal of the Compliance, Safety, Accountability (CSA) program is to reduce large truck and bus crashes, injuries and fatalities. This overview course will provide commercial motor vehicle (CMV) drivers with important high-level information about the new CSA program.

Languages Available:
English

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- Transportation Safety

Content Suite:

- Commercial Drivers
Suite (IACET CEU=0.4)

Course Objectives:

Explain the purpose of the CSA program and operational model;Explain components of the CSA program;Identify driver responsibilities according to the CSA program;Recognize differences between the CSA Safety Measurement System, or SMS, and the previous SafeStat System;Explain the Behavior Analysis and Safety Improvement Categories, or BASICS;Describe how the Driver Safety Measurement System (DSMS) works

Runtime: 21

Compressed Air Safety Awareness

PS5-100732

On its own, air is not necessarily dangerous. However, when you compress it, it creates hazards like noise, flying objects and static electricity. Take this course to review the hazards associated with compressed air and what you can do to avoid them. This course is ideal for people who use pneumatic tools or supervise those who do.

 - OSHA 30: Construction Outreach Training Course (IACET CEU=3.0)
 - OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored)

Course Objectives:
Know what the hazards of using compressed air are and how you can avoid them

Runtime: 8

Compressed Gas Cylinder Safety

PS5-00316

You do not want to be near a rocket or fragmentation bomb when it goes off. Well, that is what a compressed gas cylinder may become if used improperly. The course will teach you about the hazards of these highly pressurized containers, how they must be labeled, and how they must be stored, handled and transported to prevent leaks, burns and explosions. Ideal learners are employees who work with or around compressed gas cylinders.

Languages Available:
Dutch (PS5-101083)

Runtime: 15

Confined Space Awareness for Construction

PS5-102015

If one of your co-workers passed out in a confined space, would you go in to rescue him? Can you be sure the air in the space is safe? This training will help you understand the risks associated with confined spaces and the procedures your employer has in place to protect you and those around you. Do not take this information lightly. It can make the difference between life and death! Ideal learners are anyone who works in or around confined spaces on construction sites.

Contractor Safety (US)

OSHA requires that companies provide a safe workplace for all workers. In order to provide a safe workplace, rules must be in place. Accidents occur as a result of an unsafe condition or an unsafe act, or both. Both are the result of the actions of people. All accidents and injuries are preventable. This orientation will explain the rules in place to prevent accidents and provide a safe workplace.

 - OSHA 30: Construction Outreach Training Course (IACET CEU=3.0)
 - OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored)

Course Objectives:
Identify sources of driver distraction;Know how to avoid distractions while driving

Runtime: 16

Domestic Preparedness Awareness Overview (US)

PS5-00714

The purpose of this course is to provide training for Domestic Preparedness Awareness Level instruction. The presentation is designed to increase knowledge about nuclear, biological, and chemical agents, often called NBC agents.

Languages Available:
English

Format: eLearning - Claro

- Libraries:**
 - Safety Catalog
- Topic/Industry:**
 - General Safety and Manufacturing

Course Objectives:
Recent history of NBC weapons that have been used;Basic signs and symptoms of an NBC attack;Potential types of dissemination devices;Actions to take in response to a terrorist incident involving NBC

Runtime: 40

DOT Driver Compliance (US)

PS5-01414

This training covers some important U.S. Department of Transportation (DOT) rules that all Commercial Motor Vehicle (CMV) drivers are required to follow. The purpose of all of these rules is to keep CMV drivers and everyone else on the road safe.

Languages Available:
English

Format: eLearning - Claro

- Libraries:
- Topic/Industry:
- Safety Catalog
 - Transportation Safety

Content Suite:

- Commercial Drivers Suite (IACET CEU=0.4)

Course Objectives:

Recall the documents and other requirements needed for a qualified driver;Know the Hours-of-Service regulations, including the maximum daily and weekly driving times and the daily and weekly on-duty and off-duty time requirements;Know how to correctly fill out a daily log sheet;Know how to ensure that all required inspections are conducted when needed;Recall important HAZMAT compliance issues;Identify whistleblower protections for safety issue reporting;Know what a DOT auditor will look for during an inspection;Recognize what is included in the Compliance, Safety, Accountability (or CSA) program

Runtime: 31

Driver Fatigue (US)

PS5-01287

Fatigue impairs a driver's ability to safely operate a large truck or other types of equipment. It leads to accidents that cause vehicle damage, property damage, injury and even death.

Explains other factors that contribute to driver fatigue;Identifies the signs and symptoms you need to watch for;Equips you with ways to fight this dangerous and deadly condition

Runtime: 26

Driver Wellness (US)

PS5-01334

This awareness-level course is intended to provide commercial motor vehicle (CMV) drivers with information about how to improve and maintain their health. It will cover some common health concerns for drivers as well as things they can do to improve their physical condition.

Languages Available:
English

Format: eLearning - Claro

- Libraries:
- Topic/Industry:
- Safety Catalog
 - Transportation Safety

Content Suite:

- Commercial Drivers Suite (IACET CEU=0.4)

Course Objectives:

Identify federal regulations regarding driver fitness;List some of the common health hazards for commercial motor vehicle (CMV) drivers;Explain how poor driver health may impact drivers and carriers;Describe what you can start doing right away to improve your health;Identify the benefits of healthy choices and activities

Runtime: 25

Drug and Alcohol Awareness

Substance abuse causes harm to more people than just the abuser. This course teaches workers what substance abuse is and it outlines the costs of substance abuse to employers. It also provides facts about commonly abused substances and how to reduce the risks of substance abuse. Ideal learners are all employees, including managers and supervisors.

Format: eLearning - Claro

- Libraries:**
 - Safety Catalog
 - Health and Wellness
 - Employment Liability
 - Transportation Safety
- Topic/Industry:**
 - Awareness
 - Drug and Alcohol Policies

Content Suite:

- Working from Home Suite

Course Objectives:
Define substance abuse;Identify the effects of substance abuse;Explain ways to reduce the risk of substance abuse

Runtime: 16

PS5-102574

Languages Available:
English

Drugs and Alcohol: The Facts

Substance abuse causes harm to more people than just the abuser. This course teaches workers what drug and alcohol abuse is and it outlines the costs of substance abuse to employers. It also provides facts about commonly abused substances and how to reduce the risks of substance abuse. Ideal learners are all employees, including managers and supervisors.

Format: eLearning - Claro

- Libraries:**
 - Safety Catalog
 - Employment Liability
 - Transportation Safety
- Topic/Industry:**
 - Drug and Alcohol Policies
 - Health and Wellness

Content Suite:

- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7)

Course Objectives:
Define substance abuse;Identify the effects of substance abuse;Specify the costs of substance abuse in the workplace;Explain ways to reduce the risk of substance abuse;Identify resources for education, prevention and intervention

Runtime: 44

Drugs and Alcohol: The Facts (US)

PS5-01368

Languages Available:
English

Substance abuse causes harm to more people than just the abuser. This course teaches workers what substance abuse is and it outlines the costs of substance abuse to employers and co-workers. It also provides facts about commonly abused substances and how to reduce the risks of substance abuse. Ideal learners are all employees, including managers and supervisors.

Format: eLearning - Claro

Libraries:

- Safety Catalog
- Employment Liability

Topic/Industry:

- Drug and Alcohol Policies
- Health and Wellness

Content Suite:

- Reasonable Suspicion Training (US) Suite
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored)
- Reasonable Suspicion Training (US) Suite (IACET CEU=0.2)
- DOT Compliance Training Suite (IACET CEU=0.2)

Course Objectives:

Define substance abuse;Identify the effects of substance abuse;Specify the costs of substance abuse in the workplace;Explain ways to reduce the risk of substance abuse;Identify resources for education, prevention and intervention

Runtime: 50

Dust Mask - Voluntary Use Guidelines

PS5-00296

You are probably exposed to some level of dust in your workplace, dust that may pose a variety of health hazards. If those hazards are significant enough, your employer will require that you use respiratory protection. If the hazards are minor and protection is not mandated, you can choose to wear a dust mask. This course will explain how to select, use and care for dust masks. Ideal learners are employees in the heavy equipment, manufacturing (production and maintenance), construction and mining industries, and their supervisors.

Languages Available:
Spanish (Latin America) (PS5-102277)
English

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- General Safety and Manufacturing

Content Suite:

- Working from Home Suite
- Advanced Safety Orientation for Construction Industry (IACET CEU=0.9)
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7)
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored)
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0)

Course Objectives:

Differentiate between types of respirators;Recognize situations in which it is a good idea to voluntarily use a dust mask;Recall how to properly use a dust mask;Determine if a dust mask is in good working order

Runtime: 14

Effective Supervision (US)

In the increasingly competitive marketplace of today, people are the most valuable resource in an organization. Effectively supervising this resource is crucial to success. This course presents the tools needed to be an effective supervisor. The course will help those new to the supervisory role transition to their new responsibilities, while providing a good review for more seasoned supervisors. Ideal learners are supervisors and managers.

Format: eLearning - Claro

Libraries:
 • Safety Catalog

Topic/Industry:
 • Employment Liability

Course Objectives:

Recognize the importance of being an effective supervisor;Understand the multiple roles a supervisor plays;Identify common mistakes to avoid;Describe how to transition to a supervisory position;List seven supervisory styles and understand when and how to use them;Describe how to manage better using motivation, accountability, recognition and communication

Runtime: 33

Egress and Emergency Action Plans

Fires injure or kill thousands of workers annually. Those are the losses due to fires, but there are other hazardous situations that can threaten the life of a worker and health. These situations include severe weather, medical emergencies, chemical releases, and bomb threats. We cannot completely eliminate dangerous workplace situations, but we can reduce the number of associated injuries and deaths. This course will focus on two important aspects of this effort. Ideal learners are all employees.

Format: eLearning - Claro

Libraries:
 • Safety Catalog

Topic/Industry:
 • General Safety and Manufacturing

Content Suite:

- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7)

Course Objectives:

Identify the different components of an exit route;Describe the general recommendations of egress;Explain the detailed elements of egress;Discuss the core elements of an emergency action plan

Runtime: 28

PS5-00312

Egress and Emergency Action Plans (US)

PS5-00231

Each year, more than 200 deaths and 5,000 injuries result from fires and explosions in the workplace. The National Fire Protection Association reported over 115,000 non-residential structural fires in a recent year, accounting for \$2.4 billion in direct property damage. Those are the losses due to fires, but there are other hazardous situations that can threaten a worker's life and limb. These include severe weather, medical emergencies, chemical release, and bomb threats. We can't completely eliminate dangerous workplace situations, but we can reduce the number of associated injuries and deaths attributable to these incidents. This course will focus on two important aspects of this effort: egress and emergency action plans.

Languages Available:

Identify the components of an exit route, the fundamental requirements of egress, the detailed elements of egress and the core elements of emergency action plans

Runtime: 14

Electrical Arc Flash Awareness

An arc flash can generate a temperature of up to 19,000 degrees Celsius (35,000 degrees Fahrenheit)! Working in or near electrical panels and systems increases your chance of exposure to an arc flash. It requires that you take extreme precautions. This course will provide information to help protect you from this deadly hazard that cannot be seen or heard, until it is too late. Ideal learners are unqualified electrical personnel and their managers in a variety of industries with an emphasis on general industry maintenance and fabrication settings.

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- Awareness
- General Safety and Manufacturing

Content Suite:

- Advanced Safety Orientation for General Industry (IACET CEU=0.9)
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7)

Course Objectives:

Recognize the significance of the arc flash hazard; Define arc flash; Recall common causes of injury; Identify general precautions and safe work practices, including personal protective equipment (PPE), labels and boundaries

Runtime: 13

Runtime: 13

Electrical Safety and Lockout/Tagout (LOTO)

PS5-100553

Working with electricity can be dangerous. Workers performing service or maintenance on machinery and equipment may be injured by the unexpected startup of the machinery or equipment, or release of stored electrical energy in the equipment. In fact, failure to lock out machinery before working on it is a major cause of injury and death. These deaths and injuries can be prevented by establishing and following an effective lockout/tagout program. This training will tell you more about electrical hazards, safe practices when working with electricity, and the lockout/tagout program and how it can save your life. Ideal learners are any employee who works on or around electrical machinery.

Languages Available:
Dutch (PS5-101104)
Czech (PS5-101103)
Chinese (Simplified) (PS5-101110)
French (Canadian) (PS5-102653)
German (PS5-101106)
Japanese (PS5-101107)
Polish (PS5-101108)
Portuguese (Brazil) (PS5-101109)
Thai (PS5-101111)
French (European) (PS5-103010)
English

Format: eLearning - Claro

- Libraries:**
 - Safety Catalog
- Topic/Industry:**
 - General Safety and Manufacturing

Course Objectives:
Describe how electricity works;Define conductors and insulators;Explain how electric shock occurs;Recall safe practices for working with and around electricity;Explain the purpose of lockout/tagout;List different forms of hazardous energy;Identify who should use lockout/tagout and when it should be used;Describe the three elements of an energy control program;Recognize the types of lockout/tagout devices;List the steps for attaching and removing locks and tags;Discuss periodic inspections of lockout/tagout procedures;Understand the training recommendations for lockout/tagout

Runtime: 41

Electrical Safety and Lockout/Tagout (LOTO) (US)

PS5-01281

Working with electricity can be dangerous. Every year, between 300 and 500 people in the U.S. are killed by electrocutions at work. To handle electricity safely, you need to know how it acts, how it can be controlled, and its hazards. Workers performing service or maintenance on machinery and equipment may be injured by the unexpected startup of the machinery or equipment, or release of stored electrical energy in the equipment. In fact, failure to lock out machinery before working on it is a major cause of injury and death in the United States. These deaths and injuries can be prevented by establishing and following an effective lockout/tagout program. This training will tell you more about electrical hazards, safe practices when working with electricity, and the lockout tagout program and how it can save your life.

- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored)
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0)

Course Objectives:

Identify major electrical hazards;Describe types of electrical hazards;Protect yourself from electrical hazards;Recognize employer requirements to protect workers from electrical hazards

Runtime: 19

Electrical Safety for Construction: Power Lines and Lockout/Tagout (LOTO) (US)

PS5-102235

Workers who contact power lines or perform work on electrical equipment may be injured or even killed by the unexpected startup or release of electrical energy. You can prevent these incidents by following some basic best practices. This course will tell you about electrical hazards in construction work, safe practices when working with electricity and how a lockout/tagout program can save your life. Ideal learners are construction workers.

 - OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored)
 - OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0)

Course Objectives:
Identify major electrical hazards;Protect yourself from electrical hazards;Recognize employer requirements to protect workers from electrical hazards

Runtime: 16

Emergency Response for Multi-Story Buildings (US)

PS5-00614

In the event of an emergency in a multi-story building, all occupants need to know what to do, where to go and who is in charge. This course will provide you with the information you need to safely evacuate a multi-story building in case of an emergency.

Languages Available:
English

Format: eLearning - Claro

- Libraries:**
 - Safety Catalog
- Topic/Industry:**
 - General Safety and Manufacturing

Course Objectives:
The role of a floor warden;The risks and challenges involved when working in a multi-story building;The types of emergencies that floor wardens address;The components of an Emergency Action Plan;The role that bystanders play;What type of equipment could be used by a floor warden

Runtime: 25

Environmental Overview (US)

PS5-00892

This course provides a general understanding of how our daily work activities can potentially alter environmental balances. By being more aware of this, we can act responsibly to protect our communities, air, water, land and ourselves. Ideal learners are all employees.

Languages Available:
English

Format: eLearning - Claro

- Libraries:**
 - Safety Catalog
- Topic/Industry:**
 - Environmental

Content Suite:

- Environmental Responsibility Suite (IACET CEU=0.3)

Course Objectives:
Environmental safety and health policy;Environmental protection laws;The individual's role in protecting the environment;How job performance affects the environment;Improving environmental performance

Runtime: 12

Environmental Responsibility Part 1 (US) - Environmental and Waste Management

PS5-00269

What if your company mishandled hazardous wastes or dangerous chemicals, leading to environmental damage and worker injury? The implications for the company, your job, or even your life, would be enormous. The purpose of this 3-part series is to help you work in an environmentally responsible manner and in compliance with all applicable environmental laws and regulations. Part 1 outlines environmental goals, the purpose of environmental management systems, environmental issues such as hazardous waste and stormwater, and management practices when dealing with industrial waste. The ideal learner is anyone who must comply with environmental regulations on the job.

Format: eLearning - Claro

Languages Available:
Dutch (PS5-101042)
Czech (PS5-101043)
Chinese (Simplified) (PS5-101048)
French (European) (PS5-101041)
German (PS5-101045)
Japanese (PS5-101044)
Polish (PS5-101046)
Portuguese (Brazil) (PS5-101047)
Spanish (Latin America) (PS5-101049)

English

Libraries:
• Safety Catalog

Topic/Industry:
• Environmental

Content Suite:
• Environmental Responsibility Suite (IACET CEU=0.3)
• Environmental Responsibility, Parts 1-3 (US)

Course Objectives:

Identify our environmental mission and goals;State the purpose of an environmental management system (or EMS);Recognize the amounts of hazardous waste associated with each generator classification;Identify certain EPA-regulated environmental issues, including: hazardous waste, non-hazardous waste, industrial wastewater and stormwater;List best management practices (BMPs) for dealing with industrial waste

Runtime: 27

Environmental Responsibility Part 2 (US) - Air, Tanks, Oil and Waste

PS5-00260

This is Part 2 of a three-part course designed to promote working in an environmentally responsible manner and in compliance with all applicable environmental laws and regulations. This second part identifies EPA-regulated environmental issues concerning air emissions, stationary storage tank management, used oil and universal waste, and the best management practices for dealing with these issues. Ideal learner: Anyone who must comply with environmental regulations on the job.

Format: eLearning - Claro

• Environmental Responsibility, Parts 1-3 (US)

Course Objectives:

Identify additional EPA regulated environmental issues, including air emissions, stationary storage tanks management, used oil, and universal waste;State the best management practices for dealing with these issues

Runtime: 22

Environmental Responsibility Part 3 (US) - Storage, Handling and Response

This is Part 3 of a three-part course designed to promote working in an environmentally responsible manner and in compliance with all applicable environmental laws and regulations. This, the third part, outlines OSHA-regulated environmental issues, the elements of an Emergency Action Plan, major steps in spill and fire response, storage requirements for hazardous chemicals, and issues related to handling chemicals. Ideal learners are all employees.

Format: eLearning - Claro

Libraries: **Topic/Industry:**

- Safety Catalog
- Environmental

Content Suite:

- Environmental Responsibility Suite (IACET CEU=0.3)
- Environmental Responsibility, Parts 1-3 (US)

Course Objectives:

Identify OSHA-regulated environmental issues;List the elements of an emergency action plan for spill, fire and emergency response;Discuss the major steps in spill and fire response;List storage requirements for flammable and combustible liquids and other chemicals;Identify issues related to handling chemicals

Runtime: 26

Excavation and Trenching Safety

Excavation and trenching work is performed thousands of times daily, in all types of conditions. Unfortunately, many fatalities and work-related injuries are associated with excavation and trenching incidents. Cave-ins can occur suddenly, without warning, giving you little time to react. But their signs are present when proper safety precautions are not taken. This program has been created to increase your awareness and provide you with a better understanding of the safety procedures associated with your work. Ideal learners are employees who work in or near excavations and trenches.

Format: eLearning - Claro

Libraries: **Topic/Industry:**

- Safety Catalog
- Construction

Content Suite:

- Advanced Safety Orientation for Construction Industry (IACET CEU=0.9)
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7)

Course Objectives:

List the hazards associated with excavation and trenching work;Discuss soil mechanics and identify conditions that increase the chance of cave-in;Describe the role and responsibilities of the Competent Person;State four soil types;Describe four different types of protection systems;Discuss safety precautions and emergency response

Runtime: 30

Runtime: 13

Extreme Driving Conditions (US)

PS5-00716

Extreme weather driving includes every adverse weather condition that could cause a hazardous driving situation, such as rain, snow, ice, fog, or extremely cold or hot weather. The purpose of this training is to show drivers how to handle extreme weather conditions on the road so they can stay safe in rain, snow or shine. Ideal learners are all employees.

Languages Available:
English

Format: eLearning - Claro

- Libraries:**
 - Safety Catalog
- Topic/Industry:**
 - Transportation Safety

Course Objectives:
List key factors for driving safely in extreme weather;Describe how to drive on differing road surfaces;Discuss the actions to take when driving in winter weather;State how to reduce your speed to drive in different extreme weather conditions;Discuss how to prepare for and drive in extremely hot weather

Runtime: 22

Fall Protection

PS5-00556

Each year, many workers are hurt or killed as a result of falls in the workplace. Falls are usually complex events that involve a variety of factors. This training will cover systems and procedures designed to prevent falls off, onto or through working levels and to protect workers from being struck by falling objects. Ideal learners include all workers.

 - Advanced Safety Orientation for Construction Industry (IACET CEU=0.9)
 - Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7)
 - Advanced Safety Orientation for General Industry (IACET CEU=0.9)

Course Objectives:
Identify common fall hazards;Recognize the types of equipment and methods that provide fall protection;List the components of a personal fall protection system;Recognize the importance of inspecting fall protection equipment;Recall important information about fall rescue plans

Runtime: 48

Fall Protection (US)

PS5-00198

Each year, many workers are hurt or killed as a result of falls in the workplace. Falls are usually complex events that involve a variety of factors. For that reason, the OSHA fall protection standard deals with both human- and equipment-related issues for protecting workers from fall hazards. This training will cover systems and procedures designed to prevent falls off, onto or through working levels and to protect workers from being struck by falling objects. Ideal learners are workers who work at heights, including on ladders and aerial lifts.

Runtime: 12

Fire Watch

Every year, many workplace fires occur as a result of hot work including cutting, welding and other work that generates heat and sparks. Hot work is often being done without an adequate fire watch in place. Most, if not all, hot work incidents are completely preventable. A fire watch, conducted properly, is one of the most important ways to keep workers safe during hot work and prevent damage and destruction to property. This course covers the role and responsibilities of the fire watcher. Ideal learners are all employees.

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- General Safety and Manufacturing

Course Objectives:

Understand the hazards presented by hot work;Describe where hot work is – and is not – permitted;Identify the safety precautions needed to prepare an area for hot work;Explain the role and responsibilities of a fire watcher;Recall the responsibilities of other individuals involved in hot work;Know what emergency procedures need to be in place for hot work

Flammable and Combustible Liquids Awareness

Petroleum is a flammable liquid, and practically everyone uses it to fuel their cars. But flammable and combustible liquids are dangerous. Something as simple as whether or not you promptly put a liquid in a flammable liquid storage cabinet can be a matter of life or death. This course covers risks associated with flammable and combustible liquids, and general safety procedures such as proper storage and use. Ideal learners are all employees.

Format: eLearning - Claro

- Libraries:
- Topic/Industry:
- Safety Catalog
 - Awareness
 - General Safety and Manufacturing

Course Objectives:

Define the properties of flammable and combustible liquids;Explain the risks associated with flammable and combustible liquids;Select correct general safety procedures for working with and around flammable and combustible liquids;Identify proper storage methods for flammable and combustible liquids;Recognize violations of flammable and combustible liquid safety principles and procedures

Runtime: 11

Food Service and Distribution - HACCP Overview (US)

PS5-103059

Languages Available:
English

The Centers for Disease Control and Prevention, or CDC, estimates that, every year, millions of people in the United States become ill from pathogens in food. The number of illnesses would be even higher if the Food and Drug Administration had not adopted a food safety program focused on preventing hazards that cause foodborne illnesses by applying science-based controls at every critical point in the process, from raw materials to finished products. This program is appropriately called Hazard Analysis and Critical Control Points, or HACCP. This training provides an overview of the HACCP process. Ideal learners are anyone who works in or is associated with food service and distribution.

Format: eLearning - Claro

Libraries:	Topic/Industry:
• Safety Catalog	• Food Services and Distribution Safety

Course Objectives:

Recognize what HACCP is, its purpose and to whom it applies; Recall the seven principles of HACCP, in order; Recall the elements and practices of active managerial control, including HACCP

Runtime: 16

Forklift Awareness

PS5-102599

Languages Available:
English

Powered industrial trucks like forklifts are used every day to lift and move equipment or materials. Because of the high risk of injury and even death while operating a powered industrial truck, some use and training recommendations have been developed to improve safety. This training is ideal for all workers who operate or supervise the operation of forklifts.

Format: eLearning - Claro

Libraries:	Topic/Industry:
• Safety Catalog	• Awareness
	• General Safety and Manufacturing

Course Objectives:

State the most common causes of forklift injuries and fatalities; Identify key elements for safe operation of a forklift, including stability and load handling; Recognize the most important considerations for stopping a lift and/or ending a shift

Runtime: 12

Formaldehyde (US)

PS5-00909

Languages Available:
English

Formaldehyde is commonly used in anatomy labs, medical research and teaching facilities as a tissue preservative or as an organic chemical reagent. This course will inform you of the health risks, precautions and handling procedures you need to know when working with formaldehyde.

Format: eLearning - Claro

Libraries:	Topic/Industry:
• Safety Catalog	• Laboratory Safety
	• Construction

Course Objectives:

The uses of formaldehyde; Potential health effects of formaldehyde; How to handle formaldehyde safely; Personal protective clothing and appropriate equipment; How to respond to a chemical spill; When medical surveillance may be necessary

Runtime: 16

Giving and Receiving Feedback

No one likes to be told they are doing something the wrong way. But there are ways you can both give and receive feedback that will make such conversations productive instead of emotional. Take this course to learn best practices for giving and receiving feedback effectively. Ideal learners are managers, supervisors, safety committee members.

Format: eLearning - Claro

- Libraries:**
 - Safety Catalog
- Topic/Industry:**
 - Health and Safety Management

- Content Suite:**
- Why Incident Management Matters (WIMM) Suite (IACET CEU=0.3)
 - Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7)
 - Why Incident Management Matters (WIMM) Suite
 - OSHA 30: Construction Outreach Training Course (IACET CEU=3.0)
 - OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored)

Course Objectives:
Recognize unproductive ways to react to feedback;Recall how to give and receive feedback in a positive, productive way;Recognize the characteristics of effective feedback

Runtime: 15

PS5-00279

Grounding Fundamentals (US)

What makes a good line or cable worker? It is not just their knowledge of electrical principles or their experience. A good line worker or cable worker is one that is committed to taking the time and the steps necessary to work safely. In this course we will cover the reasons for grounding, planning your approach, and discuss details around the grounding procedure.

Format: eLearning - Claro

- Libraries:**
 - Safety Catalog
- Topic/Industry:**
 - General Safety and Manufacturing

Course Objectives:
Fundamental rules;Distance/clearance;Planning and hazard assessment;Equipment grounding procedure;Safety regulations and guidelines

Runtime: 23

PS5-01190

- Languages Available:**
- English

Guarding Floor Holes and Wall Openings (US)

PS5-00910

No one wants to fall through a floor hole or wall opening! Take this course to find out what you can do to avoid falling and protect others on your site from falling, too. You will learn to recognize floor holes and wall openings and select the right covers and guards for them. Ideal learners are all employees.

Languages Available:
Spanish (Latin America) (PS5-102636)
English

Format: eLearning - Claro

- Libraries:**

 - OSHA 30: Construction Outreach Training Course (IACET CEU=3.0)
 - OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored)

Course Objectives:
Define terms associated with floor holes and wall openings;Identify types of holes and openings that should be protected;Understand how to guard different types of holes and openings;Explain the proper design and function of railings and toeboards

Runtime: 18

Hand and Power Tool Safety

PS5-00272

Most of us use tools in our daily work. But do you realize how dangerous tools can be if they are not handled correctly? This training focuses on the importance of hand and power tool safety, the hazards that can lead to injuries and deaths, and the precautions needed to work safely with these tools. Ideal learners include anyone who works with tools.

Languages Available:
Dutch (PS5-101181)

Give examples of situations in your work that are potentially hazardous to the hands, wrists and fingers; Choose appropriate precautions to take to protect your hands, wrists and fingers; Discuss how certain types of movements can cause ergonomic problems

Runtime: 11

Hazard Communication - Labels (US)

PS5-01436

Labels keep us in the know all the time – they inform our diet decisions, they ensure we take the right medicines in the right amounts, and they keep us safe at heights and in tight spaces. The purpose of the GHS is to increase the quality and consistency of information provided to workers, employers and chemical users by adopting a standardized approach to hazard classification, labels and Safety Data Sheets.

Languages Available:
Spanish (Latin America) (PS5-00440)
English

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- General Safety and Manufacturing

Course Objectives:

The basic elements of a label under the GHS; The labeling precedence scheme when multiple hazards are present; Upcoming dates for compliance with GHS labeling requirements

Runtime: 9

Hazard Communication - Pictograms (US)

PS5-00211

Hazards are universal and languages are not. To keep individuals safe in workplaces throughout the world, regulators are working to standardize symbols, called pictograms, to communicate hazards in a consistent manner from workplace to workplace and from country to country. This mini-module covers pictograms and the hazards associated with them, as encountered on labels and Safety Data Sheets (SDSs).

Languages Available:
Spanish (Latin America) (PS5-101797)
English

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- General Safety and Manufacturing

Course Objectives:

Purpose of the GHS; Definition of pictograms; Pictograms associated with specific hazards;

Runtime: 5

Hazard Communication - Safety Data Sheets (US)

PS5-00113

When you are working with a hazardous chemical, you need to know what it is, what it does and how to stay safe around it. Safety Data Sheets (SDSs) explain the necessary information to keep you safe around hazardous substances. This course explains SDSs to managers and front-line workers in industries and environments that require the use of hazardous substances.

Languages Available:
Spanish (Latin America)
English

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- General Safety and Manufacturing

Course Objectives:

Recall how information is laid out in an SDS;Use an SDS to find information about how to work safely around a chemical;Identify SDS requirements for both users and producers

Runtime: 9

Hazard Communication (US)

PS5-00206

Workers are exposed to hazardous chemical products every day. This poses serious problems for exposed workers and their employers. Hazard Communication (HazCom) training is designed to provide workers with the information they need to recognize and avoid hazardous chemicals. This course will introduce learners to everything from the content of the HazCom Standard to how to use Safety Data Sheets (SDSs) and chemical labels to prepare for hazards or react to exposures. Ideal learners are employees who work with or around hazardous chemicals.

Languages Available:
Spanish (Latin America) (PS5-102163)
English

Format: eLearning - Claro

Libraries:

- Safety Catalog
- EHS for Life Science - Basics Library
- Medical Device Catalog
- Pharmaceutical Catalog

Topic/Industry:

- General Safety and Manufacturing

Content Suite:

- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored)
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0)
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored)
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0)

Course Objectives:

State the purpose of the HazCom Standard;Recognize who is covered by the HazCom Standard;State the four basic parts of the HazCom Standard;Identify physical and health hazards of chemicals ;List what items should be included in a hazardous chemical inventory;Recognize what should be included in the written hazard communication program;Recognize the information contained in a Safety Data Sheet (SDS) and how it is used and maintained in the workplace;Identify where and how hazard warning labels must be used;List the elements of the HazCom Standard training program

Runtime: 26

Hazard Communication Awareness (US)

PS5-00216

Workers are near hazardous chemical products every day. This poses serious problems for workers and their employers. Hazard Communication (HazCom) training is designed to provide workers with the information they need to recognize and avoid exposure to hazardous chemicals. This course will introduce learners to the HazCom Standard as well as demonstrate how Safety Data Sheets (SDSs) and chemical labels help workers to prepare for hazards and react to exposures.

Languages Available:
Spanish (Latin America) (PS5-102098)
English

Format: eLearning - Claro

- Libraries:**
 - Safety Catalog
- Topic/Industry:**
 - Awareness
 - General Safety and Manufacturing

Course Objectives:
State the purpose and basic sections of the HazCom Standard;Identify general responsibilities established by the HazCom Standard;Use Safety Data Sheets to identify physical and health hazards;Identify where and how hazard warning labels must be used

Runtime: 16

Hazard Communication for California (US)

PS5-100736

Workers are exposed to hazardous chemical products every day. This poses serious problems for exposed workers and their employers. Hazard Communication (HazCom) training is designed to provide workers in California with the information they need to recognize and avoid hazardous chemicals. This course will introduce learners to the content of Proposition 65 and the federal and California HazCom Standards. It will also explain how to use Safety Data Sheets (SDSs) and chemical labels to prepare for hazards or react to exposures. This course is ideal for all employees in California.

Languages Available:
English

Format: eLearning - Claro

- Libraries:**
 - Safety Catalog
- Topic/Industry:**
 - General Safety and Manufacturing

Course Objectives:
State the purpose of the Hazard Communication (HazCom) Standard;Recognize who is covered by the HazCom Standard;State the four basic parts of the HazCom Standard;Identify physical and health hazards of chemicals;List what items should be included in a hazardous chemical inventory;Know what California's Proposition 65 is;Recognize what should be included in the written hazard communication program;Recognize the information contained in a Safety Data Sheet (SDS) and how it is used and maintained in the workplace;Identify where and how hazard warning labels must be used;List the elements of the HazCom Standard training program

Runtime: 29

Hazard Communication for Construction: How to Use Safety Data Sheets (US)

PS5-102272

Hazardous chemicals are present on most construction sites and put the workers who use them or who work around them at risk. This Hazard Communication (HazCom) training will provide you with the information you need to understand the hazardous nature of chemicals as well as precautions for safe use, storage, cleanup, first aid and much more. Your company may enhance this online course with additional company, jobsite and chemical-specific information. This course is ideal for all construction workers.

Languages Available:
Spanish (Latin America) (PS5-102681)

Purpose of the GHS;Definition of pictograms;Pictograms associated with specific hazards

Runtime: 5

Hazardous Chemical Information - Safety Data Sheets

PS5-101706

When you are working with a hazardous chemical, you need to know what it is, what it does and how to stay safe around it. Safety Data Sheets (SDSs) are being harmonized throughout the world to maintain a consistent and thorough explanation of necessary information to keep you safe around hazardous substances. This course explains SDSs to managers and front line workers in industries and environments that require the use of hazardous substances.

Languages Available:
French (Canadian) (PS5-102725)
Portuguese (Brazil) (PS5-101857)
English

Format: eLearning - Claro

Libraries: **Topic/Industry:**
• Safety Catalog • General Safety and Manufacturing

Course Objectives:
Recognize the purpose of SDSs;Recall how information is laid out in an SDS;Use an SDS to find information about how to work safely around a chemical;Identify SDS requirements for both users and producers

Runtime: 10

Hazardous Chemical Information Awareness

PS5-102616

Workers are exposed to hazardous chemical products every day, and this poses serious problems for exposed workers and their employers. Hazard identification and classification training is designed to provide workers with the information they need to recognize and avoid hazardous chemicals. This awareness course will introduce learners to everything from the content of a hazardous chemical information program to the Globally Harmonized System of Classification and Labeling of Chemicals (GHS) to how to use Safety Data Sheets (SDSs) and chemical labels to prepare for hazards or react to exposures. Ideal learners are all employees who may be exposed to hazardous chemicals.

Languages Available:
English

Format: eLearning - Claro

Libraries: **Topic/Industry:**
• Safety Catalog • Awareness
• General Safety and Manufacturing

Course Objectives:
State the purpose of a hazardous chemical information program;State the purpose of the Globally Harmonized System of Classification and Labelling of Chemicals (GHS);Recognize what should be included in a written hazardous chemical information program;Identify how hazard warning labels and Safety Data Sheets (SDSs) are used

Runtime: 12

Hazardous Waste Minimization and Disposal

PS5-102793

The decisions we make about how to minimize and dispose of hazardous waste can affect our environment, our profitability, and our health and safety. Take this course to learn how you can help reduce waste and handle it appropriately. This course is ideal for all workers.

Languages Available:
English

Format: eLearning - Claro

Libraries: **Topic/Industry:**

- Safety Catalog
- Environmental

Course Objectives:

Identify hazardous waste; Know your role in the hazardous waste management process; Recall strategies and best practices for hazardous waste minimization; Know three methods of hazardous waste disposal

Runtime: 14

Hazards of Changing Lanes - Large Vehicles (US)

PS5-00938

Anytime a driver changes position in the flow of traffic with a large vehicle, whether passing other vehicles, merging or exiting roadways, the chances of a mishap increase. This course helps drivers become aware of safe, professional maneuvering techniques to apply when they are on the road. Ideal learners are drivers of large vehicles.

Languages Available:
English

Format: eLearning - Claro

Libraries: **Topic/Industry:**

- Safety Catalog
- Transportation Safety

Content Suite:

- Driver Safety Training -
Large Vehicles Suite
(IACET CEU=0.1)

Course Objectives:

Specify how to keep a "cushion of safety" around your truck;List effective passing techniques;Describe the best ways to merge onto and exit freeways;List strategies for overcoming your impulse to improperly change lanes.

Runtime: 8

Hazards of Changing Lanes - Light Commercial Vehicles (US)

PS5-00940

Anytime a driver changes position in the flow of traffic with a commercial vehicle, whether passing other vehicles, merging or exiting roadways, the chances of a mishap increase. This course helps drivers become aware of safe, professional maneuvering techniques to apply when they are on the road.

Languages Available:
English

Format: eLearning - Claro

Libraries: **Topic/Industry:**

- Safety Catalog
- Transportation Safety

Content Suite:

- Driver Safety Training -
Light Commercial
Vehicles Suite (IACET
CEU=0.1)

Course Objectives:

Cushion of safety;Strategies for changing lanes, passing vehicles and merging on or exiting the highway

Runtime: 10

Hazards of Speeding - Large Vehicles (US)

PS5-01362

Languages Available:
English

The vast majority of speeders realize the potential consequences of their actions. Yet many motorists continue to put themselves and others at risk when they refuse to adopt a common sense approach to driving. In this course, we will examine the hazards of speeding. We will also explore reasons why speeding just does not make good sense, even when you are rushing to meet a deadline.

Format: eLearning - Claro

Libraries: **Topic/Industry:**

- Safety Catalog
- Transportation Safety

Content Suite:

- Driver Safety Training - Large Vehicles Suite (IACET CEU=0.1)

Course Objectives:

Recall the consequences of speeding;Recognize how speeding negatively affects stopping distance;Use strategies to reduce the need to speed

Runtime: 10

Hazards of Speeding - Light Commercial Vehicles (US)

PS5-01361

Languages Available:
English

Chances are you have been instructed on the dangers of speeding at some point;and as the operator of a light commercial vehicle, you carry the responsibility of protecting not only company assets, but also the lives of others as well as your own. In this course, we will examine the hazards of speeding. We will also explore reasons why speeding just does not make good sense, even when you're rushing to meet a deadline.

Format: eLearning - Claro

Libraries: **Topic/Industry:**

- Safety Catalog
- Transportation Safety

Content Suite:

- Driver Safety Training - Light Commercial Vehicles Suite (IACET CEU=0.1)

Course Objectives:

Hazard of speeding;Speed and stopping distance;Reduce the need to speed

Runtime: 10

Hazards of Tailgating - Large Vehicles (US)

PS5-01382

Languages Available:
English

Professional drivers need to be able to react swiftly to events that may happen farther along the roadway. Tailgating limits the reaction time of professional drivers, significantly increasing the chance of an accident. This course explains the consequences of tailgating and lists strategies to overcome the impulse to tailgate.

Format: eLearning - Claro

Libraries: **Topic/Industry:**

- Safety Catalog
- Transportation Safety

Content Suite:

- Driver Safety Training - Large Vehicles Suite (IACET CEU=0.1)

Course Objectives:

Consequences of tailgating;Stopping distances;Overcoming the impulse to tailgate

Runtime: 12

Hazards of Tailgating - Light Commercial Vehicles (US)

PS5-01381

Professional drivers need to be able to react swiftly to events that may happen farther along the roadway. Tailgating limits the reaction time of professional drivers, significantly increasing the chance of an accident. This course explains the consequences of tailgating and lists strategies to overcome the impulse to tailgate.

Vehicles Suite (IACET
CEU=0.1)

Course Objectives:
Consequences of tailgating; Stopping distances; Overcoming the impulse to tailgate

Runtime: 11

HAZMAT Transportation - Part 1 - The Hazardous Materials Table (US)

PS5-00576

Because of the risks and dangers associated with shipping hazardous materials, the U.S. Department of Transportation's Pipeline and Hazardous Materials Safety Administration and its supporting agencies regulate the transport of these materials within the US and ensure we comply with the Hazardous Materials Regulations (or the HMR).

Languages Available:
English

Materials Suite (IACET
CEU=0.5)
• HazMat Transportation
Suite (US) (IACET
CEU=0.4)
• HazMat Transportation,
Parts 1-7 (US)

Course Objectives:
Identify proper shipping names; Know how to decipher the codes within the HMT; Utilize Appendices A and B of the HMT to determine which materials qualify as a hazardous substance or marine pollutant

Runtime: 28

HAZMAT Transportation - Part 2 - Shipping Papers (US)

PS5-00250

Shippers are responsible for documenting information about hazardous materials before offering them for transport. This module covers the components of a properly prepared shipping paper.

Languages Available:
English

Format: eLearning - Claro

Libraries:

- Safety Catalog

- Transportation Safety

Content Suite:

- DOT/EPA Hazardous Materials Suite (IACET CEU=0.5)
- HazMat Transportation Suite (US) (IACET CEU=0.4)
- HazMat Transportation, Parts 1-7 (US)

Course Objectives:

Identify the information required on shipping papers;Recognize the correct entries for the shipping and basic descriptions;Identify shipping paper and certification exceptions;Select the appropriate retention requirements for shipping papers

Runtime: 23

HAZMAT Transportation - Part 3 - Packaging (US)

PS5-00578

If given the task of packaging or inspecting and accepting hazardous materials for transportation, could you do so in compliance with HMR (Hazardous Materials Regulations) packaging requirements? Your employer wants to make sure you can, since the DOT and its designated agencies regulate the packaging and transportation of hazardous materials. These agencies also have the authority to inspect hazardous materials packages and fine or penalize you as well as your employer for any HMR violations. Module 3 covers general packaging requirements.

Languages Available:
English

Format: eLearning - Claro

Libraries:

- Transportation Safety

Content Suite:

- DOT/EPA Hazardous Materials Suite (IACET CEU=0.5)
- HazMat Transportation Suite (US) (IACET CEU=0.4)
- HazMat Transportation, Parts 1-7 (US)

Course Objectives:

Identify the packaging requirements and exceptions for hazardous materials;Determine which types of packages and materials are forbidden from transportation;Recall the requirements for reusing packaging, as well as for transporting leaking or damaged packages and empty packaging

Runtime: 27

HAZMAT Transportation - Part 4 - Marking (US)

PS5-00580

This series of Hazardous Materials Transportation e-Lessons provides general awareness training for the U.S. Department of Transportation (USDOT) Hazardous Materials Regulations. Module 4 covers the marking and labeling of hazardous materials.

Languages Available:
English

Format: eLearning - Claro

- Libraries:**
 - Safety Catalog
 - EHS for Life Science - Basics Library

 - Pharmaceutical Catalog
- Topic/Industry:**
 - Transportation Safety
- Content Suite:**
 - DOT/EPA Hazardous Materials Suite (IACET CEU=0.5)
 - HazMat Transportation Suite (US) (IACET CEU=0.4)
 - HazMat Transportation, Parts 1-7 (US)

Course Objectives:
Explore how to mark bulk and non-bulk packages;Detail special provisions and exceptions in marking certain types of hazardous materials and packaging;Identify general marking requirements;Describe special provisions for marking hazardous materials;Determine when exceptions apply to marking hazardous materials

Runtime: 23

HAZMAT Transportation - Part 5 - Labeling and Placarding (US)

PS5-00581

This series of Hazardous Materials Transportation e-Lessons provides general awareness training for the U.S. Department of Transportation (USDOT) Hazardous Materials Regulations. Module 5 covers Placarding.

Languages Available:
English

Format: eLearning - Claro

- Libraries:**
 - Safety Catalog

- Topic/Industry:**
 - Transportation Safety
- Content Suite:**
 - DOT/EPA Hazardous Materials Suite (IACET CEU=0.5)
 - HazMat Transportation Suite (US) (IACET CEU=0.4)
 - HazMat Transportation, Parts 1-7 (US)

Course Objectives:
Identify the general requirements for affixing labels and placards to hazardous material (HAZMAT) shipments;Determine when exceptions to these requirements apply as well as when modifications can be made to labels and placards;Use the labeling and placarding tables to select the appropriate labels and placard for hazardous materials

Runtime: 29

HAZMAT Transportation - Part 6a - Carrier Requirements - Highway (US)

PS5-00582

This series of Hazardous Materials Transportation e-Lessons provides general awareness training for the U.S. Department of Transportation's (USDOT) Hazardous Materials Regulations. Module 6 is composed of four parts: Module 6a covers Highway Carrier Requirements.

Languages Available:
English

Format: eLearning - Claro

Libraries:

- Safety Catalog
- EHS for Life Science - Basics Library
- Medical Device Catalog
- Pharmaceutical Catalog

Topic/Industry:

- Transportation Safety

Content Suite:

- DOT/EPA Hazardous Materials Suite (IACET CEU=0.5)
- HazMat Transportation Suite (US) (IACET CEU=0.4)
- HazMat Transportation, Parts 1-7 (US)

Course Objectives:

Identify the general Highway Carrier Requirements;Determine segregation requirements for hazardous materials;Select the appropriate methods of loading, unloading and transporting hazardous materials

Runtime: 22

HAZMAT Transportation - Part 6b - Carrier Requirements - Air (US)

PS5-00583

When it comes to transporting hazardous materials by air, Part 175 of the Hazardous Materials Regulations or HMR provides air carriers with the specific requirements they need to accept, handle and transport hazardous materials.

Languages Available:
English

Format: eLearning - Claro

Libraries:

- Safety Catalog
- EHS for Life Science - Basics Library
- Medical Device Catalog
- Pharmaceutical Catalog

Topic/Industry:

- Transportation Safety

Content Suite:

- DOT/EPA Hazardous Materials Suite (IACET CEU=0.5)
- HazMat Transportation Suite (US) (IACET CEU=0.4)
- HazMat Transportation, Parts 1-7 (US)

Course Objectives:

Recognize how shippers and carriers must work together to comply with HMR requirements;Identify which hazardous materials are authorized for air transportation;Determine the quantity limitation, stowage and segregation requirements for transporting hazardous materials aboard passenger and cargo aircraft

Runtime: 30

HAZMAT Transportation - Part 6c - Carrier Requirements - Rail (US)

PS5-00584

The DOT (Department of Transportation) identifies requirements for transporting hazardous materials by rail in Part 174 of the HMR (Hazardous Materials Regulations).

Languages Available:
English

Format: eLearning - Claro

Libraries:

- Safety Catalog
- EHS for Life Science - Basics Library

Topic/Industry:

- Transportation Safety

Content Suite:

- DOT/EPA Hazardous Materials Suite (IACET CEU=0.5)
- HazMat Transportation Suite (US) (IACET CEU=0.4)
- HazMat Transportation, Parts 1-7 (US)

Course Objectives:

Recall the documentation, inspection and movement requirements for hazardous materials by rail;Identify proper HAZMAT handling and loading requirements;Determine how to segregate hazardous materials and position rail cars containing these materials

Runtime: 21

HAZMAT Transportation - Part 6d - Carrier Requirements - Water (IMDG) (US)

PS5-00585

In this module, we will focus on the actions we can take to protect our waters and marine life when transporting hazardous materials by any type of vessel or ship.

Languages Available:
English

Format: eLearning - Claro

Libraries:

- Safety Catalog
- EHS for Life Science - Basics Library
- Medical Device Catalog

Topic/Industry:

- Transportation Safety

Content Suite:

- DOT/EPA Hazardous Materials Suite (IACET CEU=0.5)
- HazMat Transportation Suite (US) (IACET CEU=0.4)
- HazMat Transportation, Parts 1-7 (US)

Course Objectives:

Determine who is responsible for preparing HAZMAT packages, shipping documentation and the vessel for transportation;Select the stowage location of hazardous materials according to the segregation restrictions;Identify the appropriate handling, loading, unloading and inspection requirements for hazardous materials

Runtime: 28

HAZMAT Transportation - Part 7 - Security Awareness (US)

PS5-00223

Hazardous materials are vulnerable when they are in transit. Imagine what would happen if criminals or terrorists were able to obtain dangerous chemicals and materials! Take this course to find out what you can do to prevent that from happening. Ideal learners include people who work at companies involved in the packaging, shipment, transportation and distribution of hazardous materials.

Languages Available:
English

- DOT/EPA Hazardous Materials Suite (IACET CEU=0.5)
- HazMat Transportation Suite (US) (IACET CEU=0.4)
- HazMat Transportation, Parts 1-7 (US)

Course Objectives:

Recall security requirements for people who handle hazardous materials;Identify potential targets for hazardous material terrorism;Identify potential threats of hazardous material terrorism;Recognize the key factors that go into planning a safe route for hazardous materials transportation;Recognize ways to prevent hazardous materials from getting into the wrong hands;Use security checklists to identify and resolve security vulnerabilities

Runtime: 27

HAZMAT Transportation Awareness (US)

PS5-00575

In the United States, we ship millions of tons of hazardous materials (HAZMAT) every day. These materials can be poisonous, toxic, flammable, explosive or corrosive by nature. Take this course to learn basic information about how to identify and safely handle hazardous materials, all while complying with federal laws and regulations. This course may be taken for general familiarization and is also ideal for employees who are involved in shipping, packaging or transporting hazardous materials.

Course Objectives:

What hazardous materials and associated risks are;How they are transported;How they are regulated;What responsibilities employers, handlers, shippers and carriers have

Runtime: 10

HAZWOPER Refresher Training - Module 1 - Scope, Application and Training Requirements (US)

PS5-01395

This course is designed for professionals who engage in hazardous waste/substance operations and/or hazardous materials emergency response, and who have previously completed the 24-hour or 40-hour HAZWOPER certification course. The 13 parts in this suite address annual refresher training topics required by OSHA with 5.5 hours of instructional time in support of the overall 8-hour annual refresher requirement.

Languages Available:
English
Spanish (Latin America) (PS5-102492)

Format: eLearning - Claro

- Libraries:**

 - HAZWOPER Refresher Training, Modules 1-13 (US)

Course Objectives:
Define key terms relating to Hazardous Waste Operations and Emergency Response, or HAZWOPER;Identify the laws that regulate hazardous waste and the agencies that enforce them;Describe the operations that are covered by the HAZWOPER Standard (that is, the scope of the standard);List what you are responsible for knowing about HAZWOPER;State what training you must receive for your level of involvement in HAZWOPER

Runtime: 34

HAZWOPER Refresher Training - Module 10 - Spill Prevention (US)

PS5-00564

This is Part Ten of a 13-part series of modules on HAZWOPER designed to provide the annual refresher training as required by OSHA for all employees affected by this regulation. Part Ten covers spill prevention. Those working in hazardous waste operations and emergency response need to know how to prevent spills or leaks of hazardous materials and how to respond if or when they do occur. Prompt and proper action can mean the difference between an emergency and a disaster.

Languages Available:
English

 - HAZWOPER Refresher Training, Modules 1-13 (US)

Course Objectives:
Identify key preventive measures for spills and releases;Discuss basic precautions for handling drums and containers;List general steps to take in spill response;Give examples of physical and chemical methods of leak control

Runtime: 25

HAZWOPER Refresher Training - Module 11 - Site Control (US)

PS5-00565

This is Part 11 of a 13-part series of modules on HAZWOPER designed to provide the annual refresher training as required by OSHA for all employees affected by this regulation. Part 11 covers site control. If uncontrolled, a spill or release of hazardous waste could spread rapidly, leading to contamination on a large scale. For this reason, site control is required on a hazardous waste site. Site control helps limit the spread of contamination in the event of a spill or release of a hazardous substance and is a critical component of the HAZWOPER standard. The site control program is designed to reduce the spread of hazardous substances from contaminated areas to clean areas, to identify and isolate contaminated areas of the site, to facilitate emergency evacuation and medical care, to prevent unauthorized entry to the site, and to deter vandalism and theft. This module examines the elements of a site control program and how they can be implemented.

 - HAZWOPER Refresher Training, Modules 1-13 (US)

Course Objectives:
Identify the elements of a site control program;Discuss how these site control program elements are used to prevent contamination

Runtime: 17

HAZWOPER Refresher Training - Module 12 - Decontamination (US)

PS5-00566

This is Part 12 of a 13-part series of modules on HAZWOPER designed to provide the annual refresher training as required by OSHA for all employees affected by this regulation. Part 12 covers decontamination, an important set of procedures designed to protect the environment, emergency responders, and other people from exposures or contamination resulting from a hazardous materials incident. This module presents the basics of decontamination to prevent the spread of hazardous materials to people and the environment.

 - HAZWOPER Refresher Training, Modules 1-13 (US)

Course Objectives:
Regulatory requirements for decontamination;How personnel contamination occurs;Common decontamination procedures

Runtime: 17

HAZWOPER Refresher Training - Module 13 - Emergency Response (US)

PS5-00567

This is Part 13 of a 13-part series of modules on HAZWOPER designed to provide the annual refresher training as required by OSHA for all employees affected by this regulation. This final module of our HAZWOPER training deals with emergency response. Emergency incidents are actual or potential spills or releases of hazardous materials into the environment. Because the possibility of damage to people, property and the environment is so serious, prompt and proper emergency response is critical. Training in safe emergency response practices will reduce the chances of harm to people or property. All organizations must plan for emergencies. Depending on operations, formal HAZWOPER emergency response planning may be required and that is covered in this module.

Format: eLearning - Claro

Libraries: **Topic/Industry:**

- HAZWOPER 8-Hr Refresher Training 29 CFR 1910.120/29 CFR 1926.65 (IACET CEU=0.8)
- HAZWOPER Refresher Training, Modules 1-13 (US)

Course Objectives:

Differentiate between on-site and off-site emergencies;Describe how to conduct preplanning for emergencies;Discuss personnel considerations in the event of an emergency;Identify the elements of an emergency response plan

Runtime: 21

HAZWOPER Refresher Training - Module 2 - Environmental Issues for HAZWOPER (US)

PS5-00527

Hazardous waste operations and emergency response need to be conducted in an environmentally responsible manner and in compliance with all applicable environmental laws and regulations. This is Part Two of a 13-part series of modules on HAZWOPER designed to provide the annual refresher training as required by OSHA for all employees affected by this regulation. Part Two covers operations that are regulated by the U.S. Environmental Protection Agency (EPA) and reviews environmentally responsible ways of dealing with industrial waste to prevent pollution from hazardous waste.

Format: eLearning - Claro

Libraries: **Topic/Industry:**

- Safety Catalog
- General Safety and Manufacturing

 - HAZWOPER Refresher Training, Modules 1-13 (US)

Course Objectives:
State the purpose of the Hazard Communication Standard;Identify who is covered by the Hazard Communication Standard;Name the four basic parts of the Hazard Communication Standard;State the purpose of the Globally Harmonized System of Classification and Labelling of Chemicals (GHS);Explain how the HazCom Standard aligns with the GHS;Identify physical and health hazards of chemicals;Identify the hazard communication responsibilities of manufacturers, importers and employers;List what items should be included in a hazardous chemical inventory;Recognize what should be included in the written Hazard Communication program;Identify where and how hazard warning labels must be used;Recognize the information contained in a Safety Data Sheet (SDS) and how it is used and maintained in the workplace;List the elements of the Hazard Communication Standard training program

Runtime: 27

HAZWOPER Refresher Training - Module 4 - Hazard and Risk Assessment Techniques (US)

PS5-00529

This is Part Four of a 13-part series of modules on HAZWOPER designed to provide the annual refresher training as required by OSHA for all employees affected by this regulation. Part Four covers hazard and risk assessment. Individuals involved in hazardous waste operations and emergency response need to know and understand what hazards they may encounter in their work environment. They must be trained to identify hazards so that they can first assess them, and then take steps to control them whenever possible. This module examines the different types of hazards, their properties, and systems available for identifying them. It also discusses risk and how to assess the scene of an emergency involving hazardous waste.

Format: eLearning - Claro

Libraries: **Topic/Industry:**
• Safety Catalog • General Safety and Manufacturing

Content Suite:
• HAZWOPER 8-Hr Refresher Training 29 CFR 1910.120/29 CFR 1926.65 (IACET CEU=0.8)
• HAZWOPER Refresher Training, Modules 1-13 (US)

Course Objectives:

Define hazard, risk and mishap; Identify the different types of hazards; Describe the following properties of hazardous materials - toxic, corrosive, flammable and explosive, unstable and reactive, pyrophoric, oxidizers, asphyxiants, cryogenic, and radioactive materials; Give examples of hazard identification systems and how to use them; Identify common process equipment hazards; Summarize how to conduct a hazard assessment of a spill or release scene

Runtime: 37

Languages Available:
English
Spanish (Latin America) (PS5-102577)

HAZWOPER Refresher Training - Module 5 - Toxicology (US)

PS5-00530

This is Part Five of a 13-part series of modules on HAZWOPER designed to provide the annual refresher training as required by OSHA for all employees affected by this regulation. Part Five covers toxicology. Everyone is exposed on and off the job to a variety of chemical substances. Most are not hazardous under ordinary circumstances, but they all have the potential to cause injury at some concentration. How a material is used is the major factor for determining its hazard potential. The module provides an overview of toxicology to help trainees understand the potential effects of the hazardous substances they work with.

Format: eLearning - Claro

Libraries: **Topic/Industry:**
• Safety Catalog • General Safety and Manufacturing

Content Suite:
• HAZWOPER 8-Hr Refresher Training 29 CFR 1910.120/29 CFR 1926.65 (IACET CEU=0.8)
• HAZWOPER Refresher Training, Modules 1-13 (US)

Course Objectives:

Define toxicology; Use important terminology associated with toxicology; List the routes of entry for toxic exposure; Identify target organs; Describe the possible responses to toxic exposure

Runtime: 28

Languages Available:
English
Spanish (Latin America) (PS5-102579)

HAZWOPER Refresher Training - Module 6 - Monitoring and Medical Surveillance (US)

PS5-00531

This is Part Six of a 13-part series of modules on HAZWOPER designed to provide the annual refresher training as required by OSHA for all employees affected by this regulation. Part Six covers monitoring and medical surveillance. Monitoring helps to determine what protection is needed before exposure to hazardous materials. Medical surveillance allows for the early detection of diseases or conditions caused by exposure to hazardous materials so treatment can be given to prevent further illness.

Format: eLearning - Claro

 - HAZWOPER Refresher Training, Modules 1-13 (US)

Course Objectives:

What monitoring is;Air monitoring equipment and how it is used;Requirements of a medical surveillance program;Who is covered by the medical surveillance program;What medical examinations are given as part of the program

Runtime: 30

Languages Available:

English

Spanish (Latin America) (PS5-102580)

HAZWOPER Refresher Training - Module 7 - Respiratory Protection (US)

PS5-00532

This is Part Seven of a 13-part series of modules on HAZWOPER designed to provide the annual refresher training as required by OSHA for all employees affected by this regulation. Part Seven covers respiratory protection. Respirators provide vital protection against chemicals and oxygen-deficient atmospheres. For this reason it is critical to know how to select and use the appropriate respirator for the job. All respirators are not created equal: not all of them will provide protection in atmospheres with low oxygen or certain other atmospheric hazards. In this module, those with a role in hazardous waste operations and emergency response will learn how to protect themselves from the breathing hazards they may face.

Format: eLearning - Claro

Spanish (Latin America) (PS5-102581)

HAZWOPER Refresher Training - Module 8 - Personal Protective Equipment (PPE) (US)

PS5-00533

This is Part Eight of a 13-part series of modules on HAZWOPER designed to provide the annual refresher training as required by OSHA for all employees affected by this regulation. Part Eight covers PPE, personal protective equipment, your last line of defense against hazardous materials in your work environment. Although PPE cannot provide protection from all exposure, when properly selected and worn it can prevent unnecessary harmful exposures. For this reason it is critical to select the appropriate protective equipment for the job.

 - HAZWOPER Refresher Training, Modules 1-13 (US)

Course Objectives:
PPE selection;Levels of PPE protection and the PPE components applicable to each level

Runtime: 13

HAZWOPER Refresher Training - Module 9 - Confined Spaces (US)

PS5-00534

This is Part Nine of a 13-part series of modules on HAZWOPER designed to provide the annual refresher training as required by OSHA for all employees affected by this regulation. Part Nine covers confined spaces. Many work environments contain spaces that are considered confined because their shape and size make conditions difficult for employees who must enter, work in, and exit them. There are many instances where employees who work in confined spaces face increased risk of exposure to serious hazards that could result in serious injury or death. For this reason, special procedures must be followed when working in confined spaces and they are reviewed in this module.

 - OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored)
 - Health Hazards in Construction, Parts 1-5
 - OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0)

Course Objectives:
Define the term health hazard;Recognize health hazards to which you may be exposed at a construction site

Runtime: 3

Health Hazards in Construction: Lead Awareness

PS5-102198

Lead can cause serious illness and affect the health of a worker in the long term. This course was designed to provide an awareness of the potential dangers of lead and how to control them. Ideal learners are all construction employees.

Languages Available:
English
Spanish (Latin America) (PS5-102875)

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- Construction

Content Suite:

- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored)
- Health Hazards in Construction, Parts 1-5
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0)

Course Objectives:

Identify where lead may be present on construction sites; Recall the health effects of lead exposure; Know some basic ways to prevent or limit exposure to lead

Runtime: 7

Health Hazards in Construction: Special Concerns

PS5-102199

Workers in the construction industry face health and safety hazards in their worksites every day, including exposure to wood dust, solvents and welding or cutting operations. These exposures can cause serious long-term health effects. This course was designed to provide awareness of the potential dangers and how to control them. Ideal learners are all construction employees.

Languages Available:
English
Spanish (Latin America) (PS5-102921)

Format: eLearning - Claro

Libraries: **Topic/Industry:**

- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored)
- Health Hazards in Construction, Parts 1-5
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0)

Course Objectives:

Recall the chemical-related health effects of exposure to wood dust, solvents, and welding and cutting operations; Know some basic ways to prevent or limit exposure to the hazardous conditions caused by wood dust, solvents, and welding and cutting operations

Runtime: 7

Health Insurance Portability and Accountability Act (HIPAA) Overview (US)

PS5-00133

Think about the last time you heard news about an information security breach. Chances are that you heard about company embarrassment, outraged consumers and even legal actions and fines. No one wants private information released to people who could misuse or abuse it! That is why the government enacted the Health Insurance Portability and Accountability Act, or HIPAA. This course will provide you with important information about what HIPAA is, how it applies to your job and what happens when there is an information breach. The course is intended for general industry employees.

Languages Available:
English

Format: eLearning - Claro

Libraries: **Topic/Industry:**

- Safety Catalog
- Employment Liability

Course Objectives:

Explain what HIPAA and PHI are; Recognize why HIPAA is important to patients, employers and employees; Recall how HIPAA applies to most general industry jobs; Recognize a PHI security breach; Recall what to do in case of an information breach

Runtime: 23

Hearing Conservation

Did you know that most noise-related hearing loss is completely preventable? In this course you will learn about the noise risks in your workplace and what you need to do to protect your hearing. Ideal learners include all employees who work with noisy tools or equipment or in loud environments.

Format: eLearning - Claro

Libraries:

- Safety Catalog
- EHS for Life Science - Basics Library
- Medical Device Catalog
- Pharmaceutical Catalog

Topic/Industry:

- General Safety and Manufacturing

Content Suite:

- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7)

Course Objectives:

Recognize the effects of noise on hearing;Recall the components of a hearing conservation program;Compare the advantages and disadvantages of various types of hearing protection;Know how to use and care for hearing protection

Runtime: 20

Recognize the effects of noise on hearing; Compare the advantages and disadvantages of various types of hearing protection

Runtime: 11

Heat Stress

It is easy to forget the danger that heat poses to the body, from sunburn and heat rash to heat stroke and death. Whether you work outside on hot days or in a foundry, mine, bakery or any other hot or humid environment, the key to preventing excessive heat stress is knowing the hazards of working in heat and the benefits of implementing proper controls and work practices. You will learn about all of these in this training. Ideal learners include all employees, managers and supervisors.

Format: eLearning - Claro

Libraries:

Recognize the health risks associated with exposure to hexavalent chromium;Identify where hexavalent chromium is found;Recognize who may be exposed to hexavalent chromium;Recall best practices for hexavalent chromium exposure prevention and control

Runtime: 15

Hot Work

Many destructive fires are caused by hot work, or cutting, welding and other work that generates heat and sparks. When you follow them properly, various recommendations for hot work can help ensure that you and your co-workers stay safe. This course covers hazards, safety precautions, responsibilities and emergency procedures associated with this dangerous work. Ideal learners are all employees.

Format: eLearning - Claro

Libraries:	Topic/Industry:	PS5-100552
<ul style="list-style-type: none"> Safety Catalog 	<ul style="list-style-type: none"> General Safety and Manufacturing Health and Safety Management 	Languages Available: Dutch (PS5-101257) Czech (PS5-101256) French (Canadian) (PS5-102682) German (PS5-101259) Japanese (PS5-101260) Polish (PS5-101261) Portuguese (Brazil) (PS5-101262) Thai (PS5-101263) English

Course Objectives:

Determine where hot work is, and is not, allowed;Identify the hazards and safety precautions associated with performing hot work;Separate the responsibilities of individuals involved in hot work;Recall how a hot work permit is used;Know what emergency procedures should be in place for hot work

Runtime: 24

Hot Work (US)

Many destructive fires are caused by hot work or the cutting, welding and other work that generates heat and sparks. Various regulations and codes cover hot work and, when followed properly, help ensure you and your co-workers stay safe. This course covers hazards, safety precautions, responsibilities and emergency procedures associated with this dangerous work. Ideal learners include all employees.

Runtime: 31

Hydraulic Safety (US)

PS5-00294

Hydraulic systems are extraordinarily powerful. They can lift and crush cars, houses and giant boulders. That kind of force requires strict safety measures to keep people working on or near hydraulic systems safe. Take this course so that you will be aware of the hazards, how to prevent accidents and how to protect yourself. Ideal learners are employees who work on or around hydraulic equipment. Note that while this course may be used as part of an overall training plan for qualified employees who build, dismantle, maintain and repair hydraulic systems, these audiences need additional in-depth and machine-specific training that is beyond the scope of this general awareness course.

Course Objectives:

Recognize the hazards associated with hydraulics;Identify safety practices to follow during hydraulic inspections;Recall general safe work practices when working on or around hydraulics;Know what to do for injuries caused by hydraulic fluid

Runtime: 19

Hydrogen Sulfide (H2S) Awareness

PS5-102133

You notice the faint smell of rotten eggs and see a co-worker collapse. Do you know what could be happening? How will you get help for your co-worker and avoid becoming another victim? In this course, you will get the answers to these questions. You will learn about the characteristics and dangers of hydrogen sulfide (H2S) and what to do if you suspect it is present. This training is ideal for workers in general industry, manufacturing and construction.

Course Objectives:
Know what hydrogen sulfide is;Know where hydrogen sulfide is found;Know the properties and characteristics of hydrogen sulfide

Runtime: 21

Hydrogen Sulfide Safety Part 2 (US)

PS5-00713

Part 2 of this two-part course identifies how you can detect, monitor and protect yourself from hydrogen sulfide (H2S). This course also addresses H2S contingency and emergency response plans.

Languages Available:
French (Canadian) (PS5-103005)
English

Format: eLearning - Claro

- Libraries:**
 - Safety Catalog
- Topic/Industry:**
 - General Safety and Manufacturing

- Content Suite:**
- Hydrogen Sulfide Safety, Parts 1-2 (IACET CEU=0.1)
 - Hydrogen Sulfide Safety Parts 1-2 (US)

Course Objectives:
Know the effects of exposure to hydrogen sulfide;Know how hydrogen sulfide can be detected and monitored;Recall how to protect oneself from exposure;Know the contingency and emergency response plans for hydrogen sulfide release;Recall how to rescue a person who has been exposed and what first aid they need

Runtime: 18

Incident Investigation

Have you ever heard the old expression that the definition of insanity is doing the same thing over and over and expecting different results? We can apply that expression to safety in the case of companies that keep doing the same things over and over but somehow expect that their workplaces will somehow become safer. The bottom line is that we have to look at what we are doing and figure out how we can improve. That is why we have incident investigation and causal analysis! This course will explain how you can turn safety incidents into opportunities for continuous improvement. You will learn about how to gather information, find underlying causes and take corrective actions. This course is intended for all industries and construction employees, including managers

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- Health and Safety Management

Content Suite:

- Why Incident Management Matters (WIMM) Suite (IACET CEU=0.3)
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7)
- Why Incident Management Matters (WIMM) Suite
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored)

Course Objectives:

Know why incident investigation and causal analysis are important;Define concepts and terms associated with incident investigation;Identify why incident investigation matters, when it occurs and who is involved;Know how to apply best practices for gathering information when an incident occurs;Keep asking “why” to perform causal analysis;Recall what to do once investigations are complete

Injury and Illness Prevention Program (IIPP) (US)

Many employers have written Injury and Illness Prevention Programs (IIPPs or I2P2s) to help protect their workers from health and safety hazards on the job, thanks to Cal/OSHA and the California Occupational Safety and Health Act. This training describes IIPP program elements so employees know where to go with questions, concerns and ideas about safety and health issues. Many states have requirements or voluntary guidelines for workplace injury and illness prevention programs. While this training course is based on Cal/OSHA requirements, many of the guidelines and best practices apply to other state programs. Ideal learners are all employees.

Format: eLearning - Claro

- Libraries:
- Topic/Industry:
- Safety Catalog
 - General Safety and Manufacturing
 - Health and Safety Management

Course Objectives:
Description of California’s Injury and Illness Prevention Program (IIPP) requirement;IIPP Elements;Employee, supervisor and employer IIPP responsibilities

Runtime: 24

Inspections and Observations

If you saw an unsafe condition at work, would you know what to do? If you were performing a safety inspection, would you know how to make the most of your time? In this course, you will learn how you can use inspections and observations to promote safety in your workplace. Ideal learners include managers, supervisors, safety committee members.

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- Health and Safety Management

Content Suite:

- Why Incident Management Matters (WIMM) Suite (IACET CEU=0.3)
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7)
- Why Incident Management Matters (WIMM) Suite
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored)

Course Objectives:

Know why inspections and observations are important;Anticipate and react to negative perceptions about inspections and observations;Identify ways to prepare for inspections and observations;Recall and use best practices for inspections and observations;Know what to do after an inspection and observation

Runtime: 27

- OSHA 30: Construction
Outreach Training
Course (IACET
CEU=3.0) (Actively
Proctored)

Course Objectives:

Explain the purpose of industrial hygiene;Classify the types of hazards addressed by industrial hygiene;Describe the routes of entry of contaminants into the human body;Recognize when different types of air contaminants may be present;Recall units of concentration and exposure threshold limit values;Recognize key aspects of hearing conservation

Runtime: 28

Introduction to OSHA (US)

PS5-00217

After the Occupational Safety and Health Act was passed in 1970, OSHA (Occupational Safety and Health Administration) was established to help make our workplaces safer. This course examines the role of OSHA in promoting the health and safety of American workers as well as the rights and responsibilities of the employer and the employee.

Format: eLearning - Claro

Libraries: **Topic/Industry:**

- Safety Catalog
- General Safety and Manufacturing
- Health and Safety Management

Content Suite:

- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored)
- OSHA 10: General Industry Outreach Training Course (High-Tech/Semiconductor) (IACET CEU=1.0)
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0)
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored)
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0)

Course Objectives:

Explain why OSHA is important to workers; Explain worker rights under OSHA; Discuss employer responsibilities under OSHA; Discuss the use of OSHA standards; Explain how OSHA inspections are conducted

Runtime: 54

Ionizing Radiation

PS5-01286

Although radiation offers many benefits, exposure to it can also threaten our health and the quality of our environment. We cannot eliminate radiation, but this training shows how we can reduce our risk by controlling our exposure to it. Ideal learners include for workers whose job duties require them to work or spend time in any portion of an area where harmful radiation may be present.

Languages Available:
Spanish (Latin America) (PS5-102781)
English

Format: eLearning - Claro

Libraries:

Content Suite:

- HAZWOPER 8-Hr Supplemental Training
29 CFR 1910.120/29 CFR 1926.65 (IACET CEU=0.3)
- HAZWOPER 8-Hr Refresher Training 29 CFR 1910.120/29 CFR 1926.65 (IACET CEU=0.8)

Course Objectives:

Define ionizing radiation;Identify types and sources of ionizing radiation;Recognize the risks and health effects of exposure to radiation;Describe basic practices to maintain radiation exposures "as low as reasonably achievable";Recall measures used to control radiation doses in the workplace;Recognize what to do in the event of an emergency involving ionizing radiation

Runtime: 27

Job Hazard Analysis (JHA)

What if you could eliminate or minimize risks before an incident occurs? You can. In fact, a job hazard analysis provides a systematic way to identify potential hazards for a task so you can take measures to remove or control the risks. There are also additional benefits to conducting a job hazard analysis, which you will learn about in this course.

Format: eLearning - Claro

- Libraries:**
 - Safety Catalog
- Topic/Industry:**
 - General Safety and Manufacturing
 - Health and Safety Management

- Content Suite:**

Laboratory Biosafety Part 1: Understanding Risk (US)

PS5-102118

Languages Available:
English

Do you know how exposure to potentially infectious materials can occur in your laboratory? Take this course to find out. You will learn about common biosafety hazard classification systems and the steps used to assess and manage the risks associated with potentially infectious biological materials. This course is ideal for anyone who works in a laboratory setting.

Format: eLearning - Claro

Libraries: **Topic/Industry:**

- Safety Catalog • Laboratory Safety

Content Suite:

- Laboratory Biosafety, Parts 1-2 (US) (IACET CEU=0.1)
- Laboratory Safety Training Suite (IACET CEU=0.3)
- Laboratory Biosafety, Parts 1-2 (US)

Course Objectives:

Recall how exposure to potentially infectious materials can occur in the workplace via four exposure routes;Classify potentially infectious materials using risk groups and biosafety levels;Identify the steps in assessing and managing the risks associated with potentially infectious materials

Runtime: 17

Laboratory Biosafety Part 2: Controlling Risk (US)

PS5-102119

Languages Available:
English

Laboratory biosafety incidents are often preventable. Take this course to learn about the engineering and work practice controls you should follow, the appropriate personal protective equipment to wear in lab settings, and what to do in the event of a spill or other emergency. This course is ideal for anyone who works in a laboratory setting.

Format: eLearning - Claro

Libraries: **Topic/Industry:**

- Safety Catalog • Laboratory Safety

Content Suite:

- Laboratory Biosafety, Parts 1-2 (US) (IACET CEU=0.1)
- Laboratory Safety Training Suite (IACET CEU=0.3)
- Laboratory Biosafety, Parts 1-2 (US)

Course Objectives:

Recall various ways that risks are managed, including engineering controls and work practice controls;Identify appropriate personal protective equipment for laboratory settings;Know what to do when things go wrong, such as following spill and emergency procedures

Runtime: 27

Ladder Safety

Obviously, falling off a ladder can injure you. But did you know that falling just 4 feet (or 1 meter) can actually kill you? If there is ever a chance you will use a ladder at work, you need to use it safely. This program covers the consequences of unsafe ladder use, the types of ladders and how to use each type, and ladder safety, inspection and storage. Ideal learners include all employees who use ladders.

 - General Safety and Manufacturing

Course Objectives:
Identify lockout/tagout responsibilities;Recognize different forms of hazardous energy;Recognize types of lockout/tagout devices;Recall best practices for attaching and removing locks and tags

Runtime: 10

Logging & Chainsaw Safety (US)

PS5-01187

Logging is one of the most hazardous industries in the U.S. Medical costs for chainsaw injuries amount to about \$350 million per year in the U.S and every year, a number of loggers are fatally injured on the job. This course addresses the hazards of logging with chainsaws and safety precautions workers need to take to reduce their risk of injury on the job.

English

Format: eLearning - Claro

Libraries:
• Safety Catalog

Topic/Industry:
• General Safety and Manufacturing

Course Objectives:

Hazards related to the site, trees and equipment;General precautions – Personal protective equipment;Precautions related to site, trees and equipment;Planning and execution of logging activities down to planning the cut

Runtime: 29

Low-Speed and Utility Vehicle Safety

PS5-102855

When it comes to utility vehicles, such as golf carts, low speed doesn't mean low risk. Take this course to learn about the unique hazards you should consider before getting behind the wheel and learn how you can safely operate low-speed and utility vehicles. This course is ideal for anyone who operates or rides in low-speed and utility vehicles.

Languages Available:
English

Format: eLearning - Claro

Libraries:
• Safety Catalog

Topic/Industry:
• General Safety and Manufacturing

Course Objectives:

Recognize hazards associated with low-speed and utility vehicles; Recall ways to stay safe when operating or riding in low-speed and utility vehicles

Runtime: 11

Machine Guarding

Cutting. Shearing. Rotation. Pinch points. All of these threaten your fingers and hands. Machine guards are designed to protect you from the hazards of moving machinery parts. This training describes common hazards associated with moving machinery parts and the requirements and safeguards that should be used to minimize your risk of injury. Ideal learners are those who work with machinery.

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- General Safety and Manufacturing

Content Suite:

- Advanced Safety
Orientation for General Industry (IACET CEU=0.9)
- Advanced Safety
Orientation for Managers and Supervisors in Construction (IACET CEU=2.7)
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0)
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored)

Course Objectives:

Identify the mechanical hazards common to all machines;Recognize the types of guards used to control machine hazards;Recognize different types of safety devices used to control machine hazards;Describe other safeguards that may be used to minimize your risk of machine-related injury

Runtime: 18

Portuguese (Brazil) (PS5-102905)
English

By taking proper precautions when handling materials, you can prevent accidents ranging from small splinters, cuts or scrapes, to crushed fingers, hands and feet and even death. Take this course to learn about methods and equipment you can use to handle materials safely. You will also learn about basic ergonomic safety and health principles. This course is ideal for all employees.

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- General Safety and Manufacturing

Content Suite:

- AES Ergonomic Improvement Specialist (IACET CEU=0.2)
- Advanced Safety Orientation for General Industry (IACET CEU=0.9)
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0)
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored)

Course Objectives:

Identify potential hazards of handling and storing materials;Recall methods of injury prevention;Know how to properly move, handle and store materials;Identify the types of materials-handling equipment and how to use them;Know basic ergonomic safety and health principles

Runtime: 17

Materials Handling and Storage Awareness

PS5-102598

There are hundreds of thousands of materials handling accidents every year, ranging from small splinters, cuts or scrapes, to crushed fingers, hands and feet and even deaths. Through proper precautions, you can help prevent these incidents. Ideal learners are all employees.

Identify the types of materials-handling equipment such as cranes, rugged terrain lifts, telehandlers and powered industrial trucks, and the requirements of how to use them;Recall basic ergonomic safety and health principles

Runtime: 9

MDROs: MRSA

PS5-01457

This course provides learners with an in-depth overview of MDRO and MRSA development, risk factors and prevention techniques. This course is intended for a broad spectrum of healthcare workers.

Languages Available:
English

Format: eLearning - Claro

Libraries:
• Safety Catalog

Topic/Industry:
• Health and Safety Management

Course Objectives:

Define multidrug-resistant organisms, or MDROs; Define methicillin- and oxacillin-resistant staphylococcus aureus, or MRSA; Detect modes of transmission and symptoms of concern in patient populations; Describe the risks associated with acquiring MDROs; Identify the populations at risk of acquiring MRSA; Describe measures to prevent the transmission of MRSA in healthcare environments.

Runtime: 12

Mercury Exposure (US)

PS5-01460

This course provides learners with a basic understanding of the health hazards associated with mercury exposure as well as prevention and post-spill procedures. This course is intended for a broad spectrum of healthcare workers.

Languages Available:
English

Format: eLearning - Claro

Libraries:
• Safety Catalog

Topic/Industry:
• Healthcare

Course Objectives:

Identify health hazards associated with mercury exposure; Describe the health effects of acute and chronic mercury exposure; Describe mercury exposure prevention measures; Identify the procedures for mercury cleanup; Identify employer requirements regarding mercury exposure

Runtime: 9

Microlearning: Ignoring Lockout/Tagout

PS5-30095

Locks and tags are in place to protect you from electrical shocks and electrocution. What happens if you ignore the lockout/tagout process your company uses? Take this training to find out.

Languages Available:
English

Format: eLearning - Other

Libraries:
• Safety Catalog

• General Safety and Manufacturing

Runtime: 2

Mobile Elevated Work Platforms Awareness

PS5-102408

Not everything we have to work on is within reach. There are times we need a little help. Sometimes ladders are chosen, other times fixed scaffolds, and still other times mobile equipment like aerial lifts (also referred to as an articulating boom or bucket lifts) and scissor lifts. Working safely with this last category will be the focus of this course. Ideal learners include employees who work on or around aerial lifts and scissor lifts.

Runtime: 14

Order Picker Safety

PS5-102858

Languages Available:
English

Order pickers can make your job easier, but they also present unique hazards. Take this course to learn about the features of order pickers, how to prepare to safely use them, and what you can do to prevent accidents that could injure people or damage property. This course is ideal for learners who use or supervise people who use order pickers.

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- General Safety and Manufacturing

Course Objectives:

Recognize the features, common names and uses of order pickers; Know how to ensure that order picker operators, areas and equipment are ready for safe use; Know how to prevent accidents such as falling, crushing and tipping; Recall how to safely park order pickers

Runtime: 11

OSHA 300 Recordkeeping Requirements (US)

PS5-102949

Languages Available:
English

OSHA has a set of rules for recordkeeping. 29 CFR 1904 requires employers to record certain work-related injuries and illnesses. The rules also require that employers notify OSHA of severe incidents, such as fatalities. This training summarizes the key provisions of this rule, including explanations of OSHA forms 300, 301 and 300A. Ideal learners are managers and employers.

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- Health and Safety Management

Content Suite:

- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored)

Course Objectives:

Identify which OSHA forms should be used to record work-related injuries or illnesses; Identify which injuries and illnesses should be recorded; Protect employee privacy when recording or reporting injuries and illnesses; Classify work-related injuries and illnesses; Calculate injury and illness incidence rates; Properly record and post injuries and illnesses

Runtime: 28

OSHA Inspections for Construction and Multi-Employer Worksites (US)

PS5-00194

Languages Available:
English

OSHA is tasked with keeping American workers safe, and for that reason OSHA conducts workplace inspections. Employers and their employees need to be prepared. This training provides an overview of the OSHA inspection process for construction and multi-employer worksites. Ideal learners are all employees.

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- General Safety and Manufacturing
- Construction

- Health and Safety Management

Content Suite:

- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored)

Course Objectives:

Describe the different types of inspections that may be conducted; Summarize the inspection process; Identify the employer's rights during and after the inspection; Discuss OSHA citations and penalties; Outline OSHA's multi-employer worksite citation process

Runtime: 46

Overhead and Gantry Crane Safety

Anyone who works with cranes knows not to underestimate the daily risk of collapse, electrical accidents, falls and other serious incidents. The power that makes overhead, gantry and similar cranes so useful also makes them dangerous. By properly maintaining and operating the cranes with which you work, you can protect yourself and your co-workers. Ideal learners are crane operators and their supervisors.

Course Objectives:
Planning for the inspection;Conducting the inspection;Following up to make sure corrective actions are taken

Runtime: 28

Personal Factors in Safety

PS5-102414

How do we make safe decisions? Knowledge alone is not enough. Take this course to learn about factors that influence the actions we decide to take and how you can improve personal factors in safety. Ideal learners include all employees.

Languages Available:
Spanish (Latin America) (PS5-102737)
English

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- General Safety and Manufacturing

Content Suite:

- AES Ergonomic Improvement Specialist (IACET CEU=0.2)
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7)
- HAZWOPER 8-Hr Supplemental Training 29 CFR 1910.120/29 CFR 1926.65 (IACET CEU=0.3)
- HAZWOPER 8-Hr Refresher Training 29 CFR 1910.120/29 CFR 1926.65 (IACET CEU=0.8)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored)

Course Objectives:

Recognize how experience can have positive and negative effects on safety;Recall factors that affect our judgment;Identify the effects of stress and fatigue;Recall ways to counter the effects of stress and fatigue;Identify communication strategies to improve safety

Runtime: 14

Personal Protective Equipment (PPE) Awareness

PS5-102275

Workplaces are designed to be relatively free from hazards. Hazards that cannot be eliminated are guarded to keep workers away. Workers wear their own form of guarding, or personal protective equipment (PPE), as a final layer of protection against workplace hazards. This course is ideal for all workers who use PPE.

Languages Available:
English

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- Awareness
- General Safety and Manufacturing

Course Objectives:

Recognize the responsibilities you have relative to your employer's PPE program;Identify different types of PPE;Decide what PPE is suitable for the hazards present

Runtime: 13

Personal Protective Equipment (PPE) Overview

Workplaces can be very dangerous and unpredictable places with loud noises, falling objects, flying sparks, toxic chemicals, whirling blades and belts, you name it. So what is one way to keep yourself safe? By wearing personal protective equipment, commonly known as PPE, you can protect yourself against hazards and reduce your chances of getting hurt or even killed.

(IACET CEU=0.9)
- OSHA 10: General
Industry Outreach
Training Course (IACET
CEU=1.0)
- OSHA 10: General
Industry Outreach
Training Course (IACET
CEU=1.0) (Actively
Proctored)
- Advanced Safety
Orientation for
Managers and
Supervisors in
Construction (IACET
CEU=2.7)

Course Objectives:

Recognize the responsibilities you have relative to your employer's PPE program;Identify different types of PPE;Decide what PPE is suitable for the hazards present

Runtime: 17

Personal Protective Equipment (PPE) Overview for Construction: Using and Maintaining PPE (US)

PS5-102206

Worksites can be very dangerous and unpredictable places with loud noises, falling objects, flying sparks, toxic chemicals, whirling blades and belts, and more. So what is one way to keep yourself safe? By wearing personal protective equipment, commonly known as PPE, you can protect yourself against hazards and reduce your chances of getting hurt or even killed. Ideal learners are construction workers.

 - Construction

- Content Suite:**
- Advanced Safety Orientation for Construction Industry (IACET CEU=0.9)
 - OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored)
 - Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7)
 - OSHA 30: Construction Outreach Training Course (IACET CEU=3.0)
 - OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored)

Course Objectives:
Recognize the principles of proper PPE use, care and maintenance

Runtime: 10

Personal Protective Equipment (PPE) Part 1 - Introduction (US)

PS5-01356

This course introduces the 10-part training suite on personal protective equipment (PPE). In this introduction, you will learn about PPE standards outlined by OSHA and how employers determine PPE requirements.

Languages Available:
Spanish (Latin America) (PS5-00961)
English

Format: eLearning - Claro

- Libraries:**
 - Safety Catalog
- Topic/Industry:**
 - General Safety and Manufacturing

- Content Suite:**
- Personal Protective Equipment (PPE), Parts 1-10 (US)

Course Objectives:
List the main requirements of OSHA's PPE standard;Identify the types of hazards that may be found in your workplace;Give examples of engineering, work practice and administrative controls that could be implemented before PPE is used

Runtime: 9

Personal Protective Equipment (PPE) Part 10 - Levels of Protection and Protective Gear (US)

PS5-01439

When faced with hazards, you must select the appropriate level of protection based on the severity of the hazard. This course examines personal protective equipment (PPE) selection factors and levels of protection.

Languages Available:
Spanish (Latin America) (PS5-00964)
English

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- General Safety and Manufacturing

Content Suite:

- Personal Protective Equipment (PPE), Parts 1-10 (US)

Course Objectives:

State the key factors in the PPE selection process;Describe the different levels of PPE protection and the PPE components applicable to each level

Runtime: 11

Personal Protective Equipment (PPE) Part 2 - Head Protection (US)

PS5-01360

Head injuries can turn fatal. Therefore, it is important to be aware of potential hazards and always wear the proper head protection. This course presents head protection basics guiding you on selecting the right class of protection.

Languages Available:
Spanish (Latin America) (PS5-00966)
English

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- General Safety and Manufacturing

Content Suite:

- Personal Protective Equipment (PPE), Parts 1-10 (US)

Course Objectives:

List the hazards that typically cause head injuries;State when head protection should be worn;Describe how to select appropriate head protection for the hazards present in your work environment;Understand key concepts in the inspection and maintenance of head protection

Runtime: 8

Personal Protective Equipment (PPE) Part 3 - Eye and Face Protection (US)

PS5-01359

You increase your risk of eye and face injuries when you do not wear personal protective equipment (PPE) or select the right kind of protection for the hazard. Learn how to select hazard-specific eye and face protection in this course.

Languages Available:
Spanish (Latin America) (PS5-00965)
English

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- General Safety and Manufacturing

Content Suite:

- Personal Protective Equipment (PPE), Parts 1-10 (US)

Course Objectives:

List the hazards that typically cause eye and face injuries;State when eye and face protection should be worn;Describe how to select appropriate eye and face protection for a given set of hazards;Inspect and maintain eye and face protection

Runtime: 10

Personal Protective Equipment (PPE) Part 4 - Hand and Arm Protection (US)

PS5-01355

When engineering, work practice or administrative controls do not eliminate hand and arm hazards, you must wear the appropriate type of protection. This portion of the Personal Protective Equipment (PPE) training suite helps you guard against hand and arm injuries.

Languages Available:
English

Format: eLearning - Claro

Identify the hazards associated with power tools;Recall precautions for using power tools

Runtime: 11

Powered Industrial Trucks - Operators Overview

Powered industrial trucks like forklifts, motorized pallet jacks, tuggers, tow motors and other powered equipment are used every day to lift and move equipment or materials. Because of the high risk of injury and even death while operating a powered industrial truck, some use and training recommendations have been developed to improve safety. Specifically, it is recommended that powered industrial truck operators receive comprehensive initial training, including facility specifics, a hands-on skill demonstration in the workplace and an evaluation. Employers are also encouraged to provide refresher training on powered industrial trucks under certain circumstances.

Format: eLearning - Claro

Libraries:

Powered Industrial Trucks Module 1 - Introduction to Powered Industrial Trucks

Powered industrial trucks like forklifts, motorized pallet jacks, tuggers, tow motors and other powered equipment are used every day to lift and move equipment or materials. Every year, powered industrial trucks are involved in tens of thousands of accidents and injuries, some of which are fatal. If you are going to operate a powered industrial truck, you need to be trained and tested to make sure you know how to do it safely. Module 1 is an introduction to powered industrial trucks and their safe operation. Ideal learners are employees who operate powered industrial trucks.

Format: eLearning - Claro

Libraries:

- Safety Catalog
- EHS for Life Science - Basics Library
- Medical Device Catalog
- Pharmaceutical Catalog

Topic/Industry:

- General Safety and Manufacturing

Content Suite:

- Powered Industrial Trucks (PIT), Modules 1-3

Course Objectives:

Define what a powered industrial truck is;Recognize classes and types of powered industrial trucks;Explain the importance of using data plates and markings to find capacity information;Identify operator safety responsibilities;Recall general safety rules about pre-operation safety, traveling and stopping

Powered Industrial Trucks Module 2 - Pre-Operation Inspection and Maintenance

PS5-00771

Powered industrial trucks like forklifts, motorized pallet jacks, tuggers, tow motors and other powered equipment are used every day to lift and move equipment or materials. According to the U.S. Bureau of Labor Statistics, every year powered industrial trucks are involved in approximately 68,400 accidents, 34,000 injuries and 85 fatalities. Because of this high risk of injury and even death while operating a powered industrial truck, OSHA regulates their operation. This course covers OSHA-required information that needs to be communicated to operators during the classroom portion of their training. Module 2 covers pre-use inspections, maintenance and refueling/recharging.

Preparing for Pandemic Influenza

PS5-01035

Languages Available:
English

A pandemic occurs when a new virus, like the coronavirus (COVID-19) or the H1N1 virus, starts spreading worldwide or across a large number of international borders. Pandemics can result in fatalities and major disruptions of society, but their effects can be mitigated. That is why companies, governments and citizens around the world are undertaking preparations to delay viral spread.

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- General Safety and Manufacturing
- Health and Safety Management

Content Suite:

- Working from Home Suite

Course Objectives:

Identify elements of a pandemic and explain the difference between a pandemic and an epidemic;Recall how world and national organizations are preparing for pandemics;List the guiding principles of the National Strategy for Pandemic Influenza;Recognize ways that businesses and individuals can reduce or slow the spread of influenza

Runtime: 25

Pressure Vessel Safety (US)

PS5-01169

Languages Available:
English

We use pressure vessels in a variety of residential and industrial applications. Yet we must respect the dangers associated with them. The release of stored or potential energy and hazardous materials can cause personal injury, loss of life and catastrophic property damage. In this course, you will explore how pressure vessels are categorized and regulated, what safety measures you can take to stay safe and prevent pressure vessel failures, and what to look for when visually inspecting pressure vessels.

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- General Safety and Manufacturing

Course Objectives:

Distinguish how pressure vessels are categorized and regulated;Identify appropriate safety measures when handling, installing, operating, servicing and inspecting pressure vessels;Recognize potential hazards when visually inspecting pressure vessels

Runtime: 22

Preventing and Addressing Electrical Violations (US)

PS5-00212

Languages Available:
French (Canadian) (PS5-102305)
Spanish (Latin America) (PS5-102245)
English

This course focuses on how to troubleshoot electrical hazard issues. It is intended for all employees and has particular value for electricians and safety managers.

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- General Safety and Manufacturing
- Health and Safety Management

Course Objectives:

Recall safe work practices regarding electrical hazards;Recognize potential electrical violations in the work environment;Identify how to correct electrical violations

Runtime: 25

Preventing Back Injury

Life is hard when your back hurts. Back ailments are painful. They can be debilitating. And they may prevent you from working and enjoying activities outside of work. This course helps you understand how the back works and what you can do to prevent back injuries. Ideal learners include all employees.

Format: eLearning - Claro

- Libraries:
- Topic/Industry:
- Safety Catalog
 - General Safety and Manufacturing

- Content Suite:
- AES Ergonomic Improvement Specialist (IACET CEU=0.2)
 - Advanced Safety Orientation for General Industry (IACET CEU=0.9)
 - Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7)
 - OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0)
 - OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored)
 - OSHA 10: General Industry Outreach Training Course (High-Tech/Semiconductor) (IACET CEU=1.0)
 - OSHA 30: Construction Outreach Training Course (IACET CEU=3.0)
 - OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored)

Course Objectives:

Recall how the back works; List the most common types of back injuries; Recognize the risk factors that increase your chance of sustaining a back injury; Recall the common causes of back injuries; Identify the best ways to prevent a back injury; List the steps you should take if a back injury occurs in the workplace

Runtime: 21

Preventing Cuts and Puncture Wounds

PS5-01367

When someone gets a cut or suffers a puncture wound, precautions should be taken to prevent infection in order to help prevent serious or even life-threatening injuries. This course provides guidance on using machinery, knives and other sharp objects in a safe manner as well as treating cuts and puncture wounds. Ideal learners are all employees.

Languages Available:
Spanish (Latin America) (PS5-102022)
English

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

Industry Outreach
Training Course (IACET
CEU=1.0) (Actively
Proctored)
- OSHA 10: Construction
Industry Outreach
Training Course (IACET
CEU=1.0)

Course Objectives:

Describe the potential health risks of cuts and puncture wounds;Cite common causes of cuts and puncture wounds;Identify preventive measures to avoid cuts or puncture wounds;Describe the actions to take if you experience a cut or puncture wound

Runtime: 19

Preventing Slips, Trips and Falls

At best, slipping and tripping is embarrassing. Often, it leads to strains and sprains. At worst, it causes serious injury or even death. Preventing slips, trips and falls is fairly inexpensive and easy, but often ignored in the daily routine of trying to get work done quickly and efficiently. This course defines slips, trips and falls and details how you can avoid them. Ideal learners include all employees.

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- General Safety and Manufacturing

Content Suite:

- Advanced Safety
Orientation for General Industry (IACET CEU=0.9)
- HAZWOPER 8-Hr Supplemental Training
29 CFR 1910.120/29 CFR 1926.65 (IACET CEU=0.3)
- HAZWOPER 8-Hr Refresher Training
29 CFR 1910.120/29 CFR 1926.65 (IACET CEU=0.8)
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0)
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored)

Course Objectives:

Define slips, trips and falls;Identify major fall hazards;Protect yourself from fall hazards

Runtime: 13

Preventing Slips, Trips and Falls Awareness

PS5-102300

At best, slipping and tripping is embarrassing. Often, it leads to strains and sprains. At worst, it causes serious injury or even death. Preventing slips, trips and falls is easy, but often ignored in the daily routine of trying to get work done quickly and efficiently. This course defines slips, trips and falls and details how you can avoid them. Ideal learners include all employees.

Languages Available:
English

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- Awareness
- General Safety and Manufacturing

Content Suite:

- OSHA 10: General Industry Outreach Training Course (High-Tech/Semiconductor) (IACET CEU=1.0)

Course Objectives:

Define types of slips, trips and falls;Recognize causes of slips, trips and falls;Recall how effective housekeeping and proper equipment use can prevent slips, trips and falls

Runtime: 10

Preventing Slips, Trips and Falls: Causes

PS5-102023

You can eliminate the causes of slips, trips and falls in your workplace. Take this course to learn how! This course is ideal for all employees.

Languages Available:
English

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- Microlearning
- General Safety and Manufacturing

Content Suite:

- Microlearning: Preventing Slips, Trips and Falls Suite

Course Objectives:

Identify the causes of slips, trips and falls;Identify the Dos and Don'ts in a work area to safeguard yourself from slips, trips, and falls

Runtime: 5

Preventing Slips, Trips and Falls: Definitions and Precautions

PS5-102026

By knowing how slips, trips and falls occur, you can take appropriate actions to prevent them. Take this course to learn about hazards and precautions. This course is ideal for all employees.

Languages Available:
English

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- Microlearning
- General Safety and Manufacturing

Content Suite:

- Microlearning: Preventing Slips, Trips and Falls Suite

Course Objectives:

Explain how different falls, slips and trips occur;Describe the precautions to be taken to avoid slips, trips or falls

Runtime: 5

Preventing Slips, Trips and Falls: In the Event of a Fall

PS5-102043

Are there right and wrong ways to fall down? The answer is yes. Take this course to learn how you can make the best of a bad situation and minimize your injuries. This course is ideal for all employees.

Languages Available:
English

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- Microlearning
- General Safety and Manufacturing

Content Suite:

- Microlearning:
Preventing Slips, Trips
and Falls Suite

Course Objectives:

Describe the steps to reduce risk of injury in the event of a fall;Explain steps to be taken after a fall

Runtime: 4

Preventing Slips, Trips and Falls: Keeping Work Areas Safe

PS5-102030

Slips, trips and falls can cause numerous, sometimes severe, injuries. Take this course to learn ways you can make your workplace safer to prevent these accidents. This course is ideal for all employees.

Languages Available:
English

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- Microlearning
- General Safety and Manufacturing

Content Suite:

- Microlearning:
Preventing Slips, Trips
and Falls Suite

Course Objectives:

Implement methods to maintain safe work areas;Identify the dos and don'ts to reduce the risk of falls in a work area

Runtime: 4

Preventing Slips, Trips and Falls: Using Equipment Correctly

PS5-102031

Using the wrong equipment, or using the right equipment in the wrong way, can cause you to slip, trip and fall. Take this course to learn how to make safe choices at work. This course is ideal for all employees.

Languages Available:
English

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- Microlearning
- General Safety and Manufacturing

Content Suite:

- Microlearning:
Preventing Slips, Trips
and Falls Suite

Course Objectives:

Identify the significance of using equipment and facilities correctly;Demonstrate the correct use of the equipment

Runtime: 4

Preventing Workplace Harassment - Employees (US)

PS5-00604

This program addresses a crucial issue in the workplace, respect. Respect is reflected in a broad range of behavior. The opposite, disrespectful behavior, encompasses behavior that includes racial and sexual harassment, and discrimination. The consequences of disrespectful behavior for employees and the company can be devastating. Everyone deserves a respectful workplace, and this program will help you be able to do your part in creating one.

Format: eLearning - Claro

Libraries:	Topic/Industry:
• Safety Catalog	• Employment Liability

Course Objectives:

Respect in the workplace;Types of harassment;Discrimination;Reporting disrespectful behavior

Runtime: 30

Languages Available:
Spanish (Latin America) (PS5-102961)
English

Preventing Workplace Harassment - Managers (US)

PS5-00637

Victims of harassment have well-established rights under federal law and, in many cases, under state and local law, too. And as a Manager or Supervisor, you have an important responsibility to both prevent harassment from taking place and to address it whenever it occurs in your organization. In order to meet that responsibility, you need to know what harassment and discrimination are, what laws prohibit discrimination and harassment in the workplace, what you must do to prevent and act upon workplace harassment, and how the anti-discrimination policy of your organization helps you do this. That is what you are going to learn in this course.

Format: eLearning - Claro

Libraries:	Topic/Industry:
• Safety Catalog	• Employment Liability

Course Objectives:

Describe the laws that prohibit workplace harassment;State the legally protected classes;Provide definitions and examples of discrimination, harassment and sexual harassment;Give examples of quid pro quo and hostile work environment;Discuss your role as a supervisor in preventing workplace harassment and promoting respectful behavior;List the elements of a sound anti-harassment policy;State the actions to take if you become aware of workplace harassment

Runtime: 36

Languages Available:
Spanish (Latin America) (PS5-102960)
English

Prevention and Control of TB Part 1 (US)

PS5-01442

This course provides learners with an overview of methods to prevent and control tuberculosis, or TB, in the healthcare environment. This course is intended for a broad range of workers in the healthcare industry and is appropriate for all job descriptions, including non-healthcare workers as well as hands-on caregivers.

Format: eLearning - Claro

Libraries:	Topic/Industry:
• Safety Catalog	• Healthcare

Content Suite:

- Prevention and Control of TB, Parts 1-2 (US)

Course Objectives:

Describe methods to prevent the spread of tuberculosis (TB) in the healthcare environment;Describe the importance of having an infection control policy for TB;Describe control measures important in preventing the spread of TB;Describe housekeeping and cleaning procedures to follow for contaminated rooms;Describe components of the respiratory program and respirator use when caring for patients with suspected or confirmed TB

Runtime: 12

Languages Available:
English

Prevention and Control of TB Part 2 (US)

PS5-01474

This course provides learners with an in-depth overview of abatement methods for the control of tuberculosis (TB), including early identification, medical surveillance and case management. This course also includes information about employer recordkeeping requirements. This course is intended for a broad range of workers in the healthcare industry and is appropriate for all job descriptions, including non-healthcare workers as well as hands-on caregivers.

Languages Available:
English

Format: eLearning - Claro

Libraries: **Topic/Industry:**

- Safety Catalog
- Healthcare

Content Suite:

- Prevention and Control of TB, Parts 1-2 (US)

Course Objectives:

Describe abatement methods used in the prevention and control of tuberculosis (TB);Describe the components of a TB medical surveillance program;Describe the importance of case management in controlling the spread of TB;Describe the impact of having TB on a healthcare worker's ability to work;Describe TB recordkeeping requirements for the healthcare industry

Runtime: 10

Process Safety Management (PSM) (US)

PS5-102389

When managing hazards associated with work processes using highly hazardous chemicals, Process Safety Management, or PSM, programs require active participation by both the employer and the employee to prevent harm from coming to hundreds and thousands of people. In this course, you will learn about proactive identification, evaluation and either prevention or mitigation of chemical releases that result from failures in processes, procedures or equipment. This course is ideal for supervisors, managers and other employees who are unfamiliar with the purpose and general requirements of PSM programs.

Languages Available:
Spanish (Latin America) (PS5-102606)
English

Format: eLearning - Claro

Libraries: **Topic/Industry:**

- Safety Catalog
- General Safety and Manufacturing

Course Objectives:

Define the purpose of a Process Safety Management (PSM) program;Know when OSHA requires a PSM program;Recall employer responsibilities regarding PSM programs;Recognize what is included in training about a PSM program;Recognize elements of a Process Hazard Analysis (PHA);Identify elements of written operating procedures, incident investigations, emergency planning and compliance audits

Runtime: 22

Process Safety Management: Compliance Audits (US)

PS5-102982

Process Safety Management (PSM) is a regulation that requires companies to comply with 14 elements to reduce the risk associated with highly hazardous chemicals in process facilities. Compliance auditing is one of the 14 elements and provides a way for companies to self-evaluate their implementation efforts. This course emphasizes the importance of performing a compliance audit to ensure they are meeting company standards. Topics in this course include: Compliance Audit, Elements, Preparation, and Conducting an Audit. After completing this course, learners will recognize what a compliance audit is, what PSM elements are included in a compliance audit, and what steps should be taken to perform an effective audit.

Languages Available:
English

Format: eLearning - Claro

Libraries: **Topic/Industry:**

- Safety Catalog
- EHS Manager

Course Objectives:

Recognize PSM regulations that apply to compliance audits; Identify how to successfully perform an effective audit

Runtime: 15

Process Safety Management: Contractors (US)

PS5-102987

Languages Available:
English

The Process Safety Management (PSM) regulation requires host employers and contractors to work together to manage process safety. This course defines different types of contractors and reviews special safety requirements for employers at multi-employer work sites. Topics in this course include: Types of Employers, Host Employers, Contract Employers, Responsible Parties, and Working Together. After completing this course, learners will be able to identify the different types of employers on a multi-employer work site, recognize the responsibilities of host and contract employers, identify which party is responsible for safety, and identify how employers work together to protect their workers.

Format: eLearning - Claro

Libraries: **Topic/Industry:**
• Safety Catalog • EHS Manager

Course Objectives:

Recognize the responsibilities that both host and contract employers have for ensuring safety at a process facility;
Identify the different ways these employers work together to protect their workers

Runtime: 20

Process Safety Management: Incident Investigation (US)

PS5-103007

Languages Available:
English

Companies that are subject to the Process Safety Management (PSM) regulations are required to investigate each incident that resulted in, or could have resulted in, a catastrophic release of highly hazardous chemicals in the workplace. This course illustrates the importance of investigating incidents and communicating incident reports internally to ensure that similar incidents do not occur in the future. Topics in this course include: Types of Incidents, Investigation Plan, Investigations, Collecting Data, Causes, Corrective Actions, and Incident Report. In this course, learners will learn about the different types of incidents that must be investigated, when incidents should be reported, how to prepare incident reports, how to uncover root causes, and how to establish an effective system to implement corrective actions.

Format: eLearning - Claro

Libraries: **Topic/Industry:**
• Safety Catalog • EHS Manager

Course Objectives:

Recognize the different types of incidents that must be investigated; Identify how to conduct incident investigations;
Recognize how to analyze the data collected in an investigation to uncover the root causes of the incident;
Recognize the importance of recommending effective corrective actions; Identify how to include recommendations in a well-organized investigation report

Runtime: 24

Process Safety Management: Mechanical Integrity (US)

PS5-103002

Languages Available:
English

Inadequate mechanical integrity caused by unsafe process equipment can cause catastrophic events in chemical processing facilities. This course illustrates the importance of a Mechanical Integrity Program (MIP) that companies are required to follow in compliance with Process Safety Management (PSM) regulations to help prevent catastrophic events. Topics in this course include: Mechanical Integrity Program, Preparation, Written Procedures, and Quality Assurance. After completing this course, learners will be able to recognize why a good MIP is important. They will also be able to identify the required elements of an MIP and recognize how to maintain the mechanical integrity of a process.

Format: eLearning - Claro

Libraries: **Topic/Industry:**
• Safety Catalog • EHS Manager

Course Objectives:

Recognize why a good MIP is important; Identify the required elements of an MIP; Recognize how to maintain mechanical integrity

Runtime: 16

Process Safety Management: Operating Procedures (US)

PS5-103009

Languages Available:
English

Operating procedures are written instructions employees follow to safely perform their jobs in process operations. This course discusses the operating procedure requirements that are part of the PSM regulations. Topics in this course include: Operating Procedures, Scope, Reviewing Procedures, New Procedures, and Proper Format. After completing this course, learners will be able to identify operating procedures, identify how operating procedures manage the risks and hazards associated with covered processes, and recognize how to develop operating procedures.

Format: eLearning - Claro

Libraries: **Topic/Industry:**

- Safety Catalog
- EHS Manager

Course Objectives:

Identify what operating procedures are; Identify how operating procedures manage the risks and hazards associated with covered processes; Recognize how to develop operating procedures

Runtime: 16

Process Safety Management: Overview (US)

PS5-103011

Languages Available:
English

Unexpected releases of toxic, reactive, and flammable liquids and gases have caused great harm and numerous deaths. Such events underscore the need for better industry practices and safety management controls. This course introduces the structure of a process safety management (PSM) program for processes involving highly hazardous chemicals. Topics in this course include: Application of PSM, Elements of a PSM Program, and Employee Involvement. After completing this course, learners will be able to recognize the components of a PSM program, the companies and processes that fall under PSM regulations, and the importance of employee involvement in a PSM program. This is the first in a series of courses on process safety management.

Format: eLearning - Claro

Libraries: **Topic/Industry:**

- Safety Catalog
- EHS Manager

Course Objectives:

Recognize the components of a Process Safety Management (PSM) program; Recognize the companies and processes that fall under PSM regulations; Recognize the importance of employee involvement

Runtime: 13

Process Safety Management: Pre-Startup Safety Review (US)

PS5-103003

Languages Available:
English

In many organizations today, companies have been cited for noncompliance with Process Safety Management violations. One of the most frequently cited is the lack of a Pre-Startup Safety Review (PSSR) when a new or modified system is introduced into a process. This course outlines the purpose of a startup, PSSR, and the process of arranging, planning and implementing PSSRs. Topics in this course include: Pre-Startup Safety Review (PSSR), Startup Types, and Performing a PSSR. After completing this course, learners will be able to define a PSSR, differentiate the two types of startups, and identify how companies perform PSSRs.

Format: eLearning - Claro

Libraries: **Topic/Industry:**

- Safety Catalog
- EHS Manager

Course Objectives:

Recognize what a startup is; Recognize what is involved in a PSSR; Recognize how PSSRs are planned and implemented

Runtime: 11

Process Safety Management: Process Hazard Analysis (US)

PS5-103013

Languages Available:
English

Employers should perform appropriate Process Hazard Analysis (PHA) techniques in their workplace to ensure employee safety. This course describes Process Hazard Analysis techniques as part of the Process Safety Management (PSM) series. Topics in this course include: Controlling Process Hazards, Risk Assessment, PHA Methods, HAZOP Method, FMEA Method, FTA Method, PHA Reports, and Implementation. After completing this course, learners will be able to identify what a PHA is and recognize the different types of PHAs a company can perform.

Format: eLearning - Claro

Libraries: **Topic/Industry:**

- Safety Catalog
- EHS Manager

Course Objectives:

Identify what a PHA is and the different types of PHAs a company can perform; Recognize how PHAs are used to identify and reduce significant process hazards

Runtime: 45

Process Safety Management: Process Safety Information (US)

PS5-103014

Languages Available:
English

In order to understand the hazards associated with a chemical process, documentation relating to the process must be gathered. This data provides the basis for developing process hazard analyses, preparing operating and maintenance procedures, training, performing incident investigations, and managing changes as they occur. This course discusses process safety information (PSI) that is part of the Process Safety Management (PSM) regulations. Topics in this course include: Process Safety Information, Chemicals, Technology, Flow Diagrams, Equipment, and Participation. After completing this course, learners will be able to identify PSI, and recognize the three main PSI categories along with the specific data gathered within them.

Format: eLearning - Claro

Libraries: **Topic/Industry:**

- Safety Catalog
- EHS Manager

Course Objectives:

Identify Process Safety Information (PSI); Recognize the three main PSI categories; Recognize the specific data gathered within them

Runtime: 14

Process Safety Management: Training (US)

PS5-103017

Languages Available:
English

The root cause of many accidents can be traced back to inadequate communication and employee training. This course discusses training as part of the Process Safety Management (PSM) series and presents information on the training requirements for employees working in process industries. Topics in this course include: Requirements, Responsibilities, Training Types, and Refresher Training. After completing this course, learners will be able to recognize the training requirements of the PSM regulations, identify what kind of training employers should provide, recognize the different training methods that might be used, and identify training documentation requirements.

Format: eLearning - Claro

Libraries: **Topic/Industry:**

- Safety Catalog
- EHS Manager

Course Objectives:

Recognize the training requirements of the PSM regulations; Identify what kind of training employers should provide; Recognize the different training methods that might be used; Identify training documentation requirements

Runtime: 11

Radiofrequency (RF) Training

PS5-102953

Languages Available:
English

Radiofrequency (RF) is an invisible energy that we use in most wireless equipment and devices, such as those for communication and heating. Although it has many important uses, RF energy also has risks that you need to understand and avoid. Take this course to learn what RF energy is, where you may find it, its hazards, how to avoid them and what to do if you've been overexposed. This course is ideal for anyone who may be exposed to RF energy.

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- General Safety and Manufacturing

Course Objectives:

Define radiofrequency (RF) energy; Identify RF sources; Recall the safety and health hazards associated with RF exposure; Know safety precautions to take to avoid overexposure to RF; Know what to do if someone has been overexposed to RF

Runtime: 11

Reasonable Suspicion Training for Alcohol and Substance Abuse (US)

PS5-00289

Languages Available:
Spanish (Latin America) (PS5-102249)
English

This course provides information about drug and alcohol policies in the workplace. It is specifically designed to cover requirements for drivers as specified by the DOT Federal Motor Carrier Safety Administration (FMCSA). It educates learners about the process of identifying potential drug and alcohol users, including spotting the indicators of substance abuse, conducting testing, and following up once results are available. This training is intended for people who manage or supervise commercial drivers.

Format: eLearning - Claro

Libraries:

- Safety Catalog
- Employment Liability
- Transportation Safety

Topic/Industry:

- Drug and Alcohol Policies
- Health and Safety Management

Content Suite:

- Reasonable Suspicion Training (US) Suite
- Reasonable Suspicion Training (US) Suite (IACET CEU=0.2)
- DOT Compliance Training Suite (IACET CEU=0.2)

Course Objectives:

Identify your company's responsibilities regarding substance abuse prevention; Recognize the behaviors that violate Federal Motor Carrier Safety Administration (FMCSA) drug and alcohol policies; List the steps for identifying employees who may be abusing a substance; Explain what to do and what not to do during the process of identifying employees who may be abusing a substance; Identify the indicators of substance abuse; Explain how safety and performance standards are enforced

Runtime: 55

Recognizing Electrical Hazards Awareness

PS5-00204

This course explains how and why electricity is dangerous so that employees may recognize when hazards are present. It is intended for workers in all industries.

- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0)
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored)

Course Objectives:

Recall how electricity works;Define key electrical terms;Recognize why electrical incidents occur;Recall the dangers associated with electrical hazards

Runtime: 13

Reporting (Data Entry)

How do you document details about what you discover during observations and incident investigations? One effective way is reports! Take this course to learn about report benefits as well as the characteristics of good reports. Ideal learners include managers, supervisors, safety committee members.

Format: eLearning - Claro

- Libraries:
- Topic/Industry:
- Safety Catalog
 - Health and Safety Management

- Content Suite:
- Why Incident Management Matters (WIMM) Suite (IACET CEU=0.3)
 - Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7)
 - Why Incident Management Matters (WIMM) Suite
 - OSHA 30: Construction Outreach Training Course (IACET CEU=3.0)
 - OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored)

Course Objectives:

Know when to complete reports;Recognize the benefits of documenting observations and incidents;Know the characteristics of effective reports

Runtime: 13

Resource Conservation and Recovery Act (RCRA) Part 1 (US)

PS5-00727

The Resource Conservation and Recovery Act (RCRA) places controls on the management of hazardous waste from its generation to its ultimate disposal. This course provides you with important information on RCRA, hazardous waste and your role in staying safe if your facility or organization produces, disposes of or accumulates hazardous waste.

Languages Available:
French (Canadian) (PS5-102777)
Spanish (Latin America) (PS5-102752)
English

Format: eLearning - Claro

- Libraries:**

 - Safety Catalog
 - EHS for Life Science - Basics Library
 - Medical Device Catalog
 - Pharmaceutical Catalog
- Topic/Industry:**

 - Environmental

Content Suite:

 - DOT/EPA Hazardous Materials Suite (IACET CEU=0.5)
 - Resource Conservation and Recovery Act (RCRA) Parts 1-2 (US)
 - Resource Conservation and Recovery Act (RCRA) Parts 1-2 (US) (IACET CEU=0.1)
 - Environmental Responsibility Suite (IACET CEU=0.3)

Course Objectives:

Define the purpose of RCRA;Determine if a waste is a hazardous waste;Identify categories of hazardous waste generators;Determine your generator status;Follow hazardous waste management and accumulation requirements;Prepare your hazardous waste for shipment off-site

Runtime: 33

Resource Conservation and Recovery Act (RCRA) Part 2 (US)

PS5-00729

Whenever you generate hazardous waste and accumulate it on-site, you must take the necessary precautions and steps to prevent any sudden or accidental release into the environment. This course explores the actions you must take to carefully operate and maintain your facility and therefore reduce the possibility of fire, explosion and release of hazardous waste.

Languages Available:
French (Canadian) (PS5-102778)
Spanish (Latin America) (PS5-102753)

 - Resource Conservation and Recovery Act (RCRA) Parts 1-2 (US) (IACET CEU=0.1)
 - Environmental Responsibility Suite (IACET CEU=0.3)

Course Objectives:
Prepare for and prevent accidents involving hazardous waste;Recognize why training is necessary to comply with RCRA;Recall waste minimization techniques;Conduct a self-inspection;Prepare for a facility inspection;Identify where to find answers to your questions about hazardous waste management

Runtime: 15

Respiratory Protection

PS5-00276

A single exposure to an airborne chemical can cause health effects that may last for the rest of your life. If your workplace contains dangerous chemicals or hazardous atmospheres, you need to know when and how to wear a respirator. This training will present the basic requirements of respiratory protection and will focus on the types and limitations of respirators. Ideal learners include all employees.

Languages Available:
Dutch (PS5-101265)

English

Format: eLearning - Claro

- Libraries:**
 - Safety Catalog
- Topic/Industry:**
 - Awareness
 - General Safety and Manufacturing

Content Suite:

- Advanced Safety Orientation for General Industry (IACET CEU=0.9)
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7)

Course Objectives:
Identify typical elements of respiratory protection programs;Describe what happens during medical evaluations and fit testing;Recognize characteristics of different types of respirators;Recall the importance of respirator inspection, maintenance and storage

Runtime: 9

Respiratory Protection Awareness (US)

PS5-01431

Languages Available:
English

Inhalation is the most common way chemicals enter the body. Therefore, understanding and complying with the OSHA Respiratory Protection Standard could prevent hundreds of deaths and thousands of illnesses annually. This training will present the basic requirements of the respiratory protection program and will focus on the types and limitations of respirators.

Format: eLearning - Claro

- Libraries:
- Topic/Industry:
- Safety Catalog
 - Awareness
 - General Safety and Manufacturing

- Content Suite:
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0)
 - OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored)
 - OSHA 30: Construction Outreach Training Course (IACET CEU=3.0)
 - OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored)

Course Objectives:
Respiratory Protection Standard requirements;Respirator selection;Capabilities and limitations of respirators;Respirator maintenance;Signs of respirator failure

Runtime: 13

Road Rage Awareness

PS5-102757

Languages Available:
English

In our fast-paced world, it seems that many drivers carry their frustrations and impatience into their vehicles with them. Road rage is something you must be aware of and control as a driver. This training is designed to give you the information you need to avoid becoming the victim of road rage or succumbing to it. Ideal learners are all drivers.

Format: eLearning - Claro

- Libraries:
- Topic/Industry:
- Safety Catalog
 - Transportation Safety

Course Objectives:
Recognize aggressive driving and road rage;Know what triggers and traits are common for drivers with road rage;Recall ways to avoid road rage

Runtime: 9

Rough Terrain Forklift Safety - Part 1: Readiness

PS5-102860

The steps you take before operating a rough terrain forklift can make a huge difference in your safety during operation. Take this course to learn what rough terrain forklifts and their components are and how to make sure operators, areas, equipment and loads are properly prepared. This course is ideal for workers who will use rough terrain forklifts and their supervisors.

Languages Available:
English

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- Construction
- General Safety and Manufacturing

Course Objectives:

Recognize rough terrain forklifts and their parts; Ensure that an operator is ready to operate a rough terrain forklift; Evaluate and prepare an area for rough terrain forklift operation; Know what is included in visual and operational inspections of rough terrain forklifts; Use a load capacity chart

Runtime: 14

Rough Terrain Forklift Safety - Part 2: Operation

PS5-102920

Before you complete vital hands-on training about how to operate rough terrain forklifts, it's helpful to understand some basic safe practices. Take this course for tips on safely starting the forklift and avoiding collisions and tip-overs. You will also learn about lifting and parking safely. This course is ideal for workers who will use rough terrain forklifts and their supervisors.

Languages Available:
English

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- Construction
- General Safety and Manufacturing

Course Objectives:

Know how and when to start rough terrain forklifts; Recall safe practices to avoid collisions when operating rough terrain forklifts; Recall safe practices to prevent tip-overs when operating rough terrain forklifts; Recall safe practices for performing lifts with rough terrain forklifts; Know how to safely park rough terrain forklifts

Runtime: 9

Safe Backing and Turning (US)

PS5-01373

Backing is our weakest skill because we spend 99% of our time driving forward. A consistent defensive approach to backing and turning can reduce the likelihood of driver error. This training is designed to serve as a training tool for new drivers as well as veteran drivers.

Languages Available:
English

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- Transportation Safety

Course Objectives:

Pre-trip inspections; Safe backing and turning procedures; Identifying potential hazards; Using spotters; Awareness of blind spots

Runtime: 29

Safe Vehicle Operations (US)

PS5-01344

This course educates commercial vehicle operators and other personnel at trucking companies about how to avoid accidents caused by speeding, following other vehicles too closely and executing turns incorrectly.

Languages Available:
English

Format: eLearning - Claro

Libraries:
• Safety Catalog

Topic/Industry:
• Transportation Safety

Content Suite:
• Commercial Drivers Suite (IACET CEU=0.4)

Course Objectives:

Explain how speed can affect the performance of a vehicle and the load it is carrying;Describe how to maintain safe following distances when behind a vehicle;List important guidelines regarding turning operations

Runtime: 10

Safety and You

PS5-01393

As a supervisor, your actions directly impact the employees you supervise. How you handle yourself, what you say and even what you do not say impact how employees behave. Therefore, we will examine several safety management approaches and help you build an enhanced climate for safety in your workplace. Ideal learners are supervisors and managers.

Languages Available:
Dutch (PS5-101520)
Czech (PS5-101519)
Chinese (Simplified) (PS5-101525)
French (European) (PS5-101521)
German (PS5-101522)
Japanese (PS5-101526)
Polish (PS5-101523)
Portuguese (Brazil) (PS5-101524)
Spanish (Latin America) (PS5-102251)
Thai (PS5-101527)
English

Format: eLearning - Claro

Libraries:
• Safety Catalog

Topic/Industry:
• General Safety and Manufacturing
• Health and Safety Management

Course Objectives:

Explain why traditional approaches to safety management are necessary but perhaps not sufficient to eliminate accidents and injuries;Identify why discipline-based safety management doesn't work to motivate safe behavior;Know how to use positive feedback to motivate safe performance;Specify how to build a climate for safety

Runtime: 46

Safety and You Awareness

PS5-102523

We make choices that affect jobsite safety every day. What motivates these choices? Are there ways to influence others and create a safer workplace? Take this course to find out! Ideal learners are all employees.

Languages Available:
English

Format: eLearning - Claro

Libraries:
• Safety Catalog

Topic/Industry:
• Awareness
• General Safety and Manufacturing
• Health and Safety Management

Course Objectives:

Know common reasons people take risks;Recognize how to motivate safe actions;Recall how to give praise and voice safety concerns

Runtime: 8

Safety and You for Construction: Encouraging Safe Work

PS5-102261

Every day, the employees you supervise make choices that affect their safety and the safety of everyone on your jobsite. What motivates their choices? Are there ways you can influence them to act safely? Take this course to find out! Ideal learners are construction supervisors and managers.

Languages Available:
Spanish (Latin America) (PS5-102515)
English

Format: eLearning - Claro

- Libraries:**
 - Safety Catalog
- Topic/Industry:**
 - Construction
 - Health and Safety Management

- Content Suite:**
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7)
 - OSHA 30: Construction Outreach Training Course (IACET CEU=3.0)
 - OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored)

Course Objectives:
Know common reasons that people take risks;Recognize how to motivate safe actions;Recall how to effectively provide feedback about work performance

Runtime: 20

Safety and You for Construction: Supervisor Role

PS5-102262

As a supervisor, your actions directly impact the employees you supervise. How you handle yourself, what you say and even what you do not say can influence the choices employees make. Therefore, we will examine several safety management approaches and help you build an enhanced climate for safety at your jobsite. Ideal learners are construction supervisors and managers.

Languages Available:
Spanish (Latin America) (PS5-102517)
English

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- Construction
- Health and Safety Management

Content Suite:

- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored)

Course Objectives:

Know how supervisor action and inaction can shape the culture of safety on a construction site; Recall ways to manage the human element in safety; Identify steps supervisors can take to improve safety at their construction sites

Runtime: 13

Safety Everywhere: Carbon Monoxide

PS5-100679

Languages Available:
English

Did you know there is a potentially deadly gas in most homes? It has no odor or color, so it is hard to detect. This dangerous gas is carbon monoxide. The good news is, there are ways you can keep yourself and your family safe. Take this course to refresh your memory about the sources of carbon monoxide, symptoms of exposure and prevention. This course is intended for everyone.

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- General Safety and Manufacturing
- Microlearning

Content Suite:

- Working from Home Suite
- Advanced Safety Orientation for General Industry (IACET CEU=0.9)
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7)
- Microlearning: Safety Everywhere Suite
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0)
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored)

Course Objectives:

Recognize sources of carbon monoxide in their homes;Remember ways to prevent carbon monoxide buildup;Know the symptoms of carbon monoxide exposure;Know what to do if they suspect the presence of carbon monoxide

Runtime: 5

Safety Everywhere: Coping with Cold

PS5-100661

Did you know that extreme cold can seriously hurt you? Take this course to find out how you can stay warm and avoid the dangers of becoming too cold. This course is intended for everyone.

Languages Available:
English

Format: eLearning - Claro

- Libraries:
- Topic/Industry:
- Safety Catalog
 - General Safety and Manufacturing
 - Microlearning

- Content Suite:
- Working from Home Suite
 - Microlearning: Safety Everywhere Suite

Course Objectives:

Know ways to warm up when it is cold;Recognize symptoms of too much cold exposure;Know what to do and not to do for victims of the cold;

Runtime: 6

Safety Everywhere: Dealing with Heat

PS5-100662

Hot temperatures can quickly go from uncomfortable to dangerous. Take this course to find out how you can stay safe in the heat. This course is intended for everyone.

Languages Available:
English

Format: eLearning - Claro

- Libraries:
- Topic/Industry:
- Safety Catalog
 - General Safety and Manufacturing
 - Microlearning

- Content Suite:
- Working from Home Suite
 - Microlearning: Safety Everywhere Suite

Course Objectives:

How heat affects your body;How to avoid heat illnesses;When to seek medical help

Runtime: 5

Safety Everywhere: Fire Safety

PS5-100573

Fires can destroy property, homes and lives. No one wants to have to deal with a fire. Fortunately, there are things you can do that will help you stop fires from happening and ensure you can stay safe if there is a fire. Take this course to learn how! This course is intended for everyone.

Languages Available:
Arabic (PS5-102631)
English

Format: eLearning - Claro

- Libraries:**
 - Safety Catalog
- Topic/Industry:**
 - General Safety and Manufacturing
 - Microlearning

- Content Suite:**
- Working from Home Suite
 - Microlearning: Safety Everywhere Suite

Course Objectives:
Remember ways to prevent and prepare for fires;Know what to include in fire safety plans;Decide what to do when there is a fire

Runtime: 5

Safety Everywhere: Staying Safe on Two Wheels

PS5-100575

When you operate a two-wheeled vehicle, whether it is a bicycle or a motorized vehicle, you are vulnerable. You do not have the same protections as you do when you are inside a car or bus. That means you need to take extra care to remain safe. In this course, we will review some basic safety advice you can use to avoid accidents and injuries. This course is ideal for operators of bicycles and motorized two-wheeled vehicles.

Languages Available:
English

Format: eLearning - Claro

- Libraries:**
 - Safety Catalog
- Topic/Industry:**
 - General Safety and Manufacturing
 - Microlearning

- Content Suite:**
- Working from Home Suite
 - Microlearning: Safety Everywhere Suite

Course Objectives:
Wear protective gear;Avoid distractions;Safely pass and change lanes

Runtime: 4

Safety Orientation

This employee safety program is much more than an examination of set rules. It is a common sense approach to training employees in order to prevent injuries and illness. Ideal learners are new employees.

Format: eLearning - Claro

- Libraries:
- Safety Catalog
 - EHS for Life Science - Basics Library
 - Medical Device Catalog
 - Pharmaceutical Catalog
- Topic/Industry:
- General Safety and Manufacturing

Course Objectives:

Realize the importance of safety in your daily responsibilities;Recall the rules to follow when handling hazardous materials or operating equipment;Report safety incidents

Runtime: 10

PS5-01352

Safety Signs (US)

You can tell a great deal about the hazardous conditions in a work area by looking at the safety signs that are posted there. Take this course to find out why we have safety signs, what they mean and what you need to know about them. This course is ideal for all workers who visit or perform work at factories, construction jobsites or healthcare facilities.

Format: eLearning - Claro

- Libraries:
- Safety Catalog
 - Pharmaceutical Catalog
 - EHS for Life Science - Basics Library
- Topic/Industry:
- General Safety and Manufacturing
 - Construction
- Content Suite:
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7)
 - OSHA 30: Construction Outreach Training Course (IACET CEU=3.0)
 - OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored)

Course Objectives:

Recall the purpose of signs;Interpret the meaning of signs;Know best practices for signs including placement and accompanying controls

Runtime: 9

PS5-100757

Languages Available:

- English

Scaffold Safety Awareness

PS5-01398

Working on scaffolding can be one of the most dangerous jobs on a construction site. It does not need to be. When they are used and maintained correctly, scaffolds are safe. This awareness-level course provides employees with vital information to help them recognize unsafe practices and to work safely on and with scaffolds. Ideal learners are employees who perform work while on scaffolds.

Languages Available:
French (Canadian) (PS5-102062)
Portuguese (Brazil) (PS5-102063)
Spanish (Latin America) (PS5-00998)
English

Format: eLearning - Claro

- Libraries:**
 - Safety Catalog
- Topic/Industry:**
 - Awareness
 - Construction

- Content Suite:**
- Advanced Safety Orientation for Construction Industry (IACET CEU=0.9)
 - Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7)
 - OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored)
 - OSHA 30: Construction Outreach Training Course (IACET CEU=3.0)
 - OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored)
 - OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0)

Course Objectives:
Identify common scaffold hazards;Explain the basic principles of scaffold safety;Recognize roles and responsibilities related to scaffold safety;Recognize scaffold design and wire rope shielding;Identify inspection responsibilities;Recall basic fall protection safety guidelines

Runtime: 21

Servicing Tires and Rims (US)

PS5-00106

This course provides those who take it with a high-level overview of general tire and rim servicing best practices. The intended audience includes anyone who services tires and rims or manages or supervises those who do.

Languages Available:
English

Format: eLearning - Claro

- Libraries:**
 - Safety Catalog
- Topic/Industry:**
 - Transportation Safety

Course Objectives:
Identify general best practices for tire and rim service and repair;Recognize the signs of tire and rim damage;Recall best practices to take during tire mounting and inflation

Runtime: 8

Sexual Harassment and Abusive Conduct Prevention for Managers (California AB 1825 and 2053) (US)

PS5-00259

When taken with Sexual Harassment Prevention for Managers, this course fulfills the California AB 1825 and AB 2053 requirements that employers of five or more employees educate supervisors about sexual harassment, discrimination, retaliation and abusive conduct every two years. Senate Bill (SB) 396 amends California's Fair Employment and Housing Act (FEHA) to include prevention of harassment based on gender identity, gender expression and sexual orientation. Potential harassment, discrimination, retaliation or abusive conduct can appear anywhere in the work environment and in many different forms. As a manager, you need to be on constant alert as to what is going on in the workplace and know how to deal with inappropriate and illegal behaviors. This course provides practical examples designed to raise management awareness of the potential employee issues and the legal liabilities associated with such conduct.

Format: eLearning - Claro

Libraries: **Topic/Industry:**

- Safety Catalog
- Employment Liability

Content Suite:

- Sexual Harassment Prevention for Managers CA AB 1825 and 2053 Suite (IACET CEU=0.3)

Course Objectives:

Identify and explain your role as a manager; Discuss California law as it relates to harassment, discrimination, retaliation and abusive conduct; Identify the components of an effective sexual harassment and abusive conduct policy; List and explain what to do when an employee comes to you with a complaint; Given a scenario, correctly identify how to effectively report complaints and educate employees regarding inappropriate behavior that violates your company's policy

Runtime: 71

Languages Available:
English

Sexual Harassment Prevention for Managers (US)

PS5-01292

Potential sexual harassment entanglements can appear anywhere in the work environment and in many different forms. As a manager, you need to be on constant alert about what goes on in your workplace and know how to deal with inappropriate and unlawful behaviors. This course provides practical examples designed to raise management awareness of potential employee issues and the legal liabilities associated with sexual harassment. To fulfill the two-hour sexual harassment training requirements of California AB 1825, this course should be taken in conjunction with Sexual Harassment and Abusive Conduct Prevention for Managers (California AB 1825 and 2053).

Format: eLearning - Claro

Libraries: **Topic/Industry:**

- Safety Catalog
- Employment Liability

Content Suite:

- Sexual Harassment Prevention for Managers CA AB 1825 and 2053 Suite (IACET CEU=0.3)

Course Objectives:

List and define the different types of sexual harassment; Identify appropriate, inappropriate and illegal behaviors through factual scenarios; Become familiar with federal laws and legal trends for sexual harassment; List the actual and hidden costs of sexual harassment; List and apply methods for resolving sexual harassment complaints; Identify and explain the role of the manager in reducing potential legal liability

Runtime: 61

Languages Available:
English

Slips Trips and Falls for Construction

PS5-101943

At best, slipping and tripping is embarrassing. Often, it leads to strains and sprains. At worst, it causes serious injury or even death. Preventing slips, trips and falls from walking and working surfaces is easy, but often ignored in the daily routine of trying to get work done quickly and efficiently. This course defines slips, trips and falls and details how you can avoid them. Ideal learners are all employees who work construction.

Languages Available:
Spanish (Latin America) (PS5-102209)
English

Format: eLearning - Claro

- Libraries:**
 - Safety Catalog
- Topic/Industry:**
 - Construction

Content Suite:

- Advanced Safety Orientation for Construction Industry (IACET CEU=0.9)
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7)
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored)
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0)

Course Objectives:

Define slips, trips and falls;Identify slip, trip and fall hazards;Identify basic requirements for walking and working surfaces;Explain causes of slips, trips and falls and ways to prevent them;Describe good housekeeping and proper equipment use;Identify falling techniques

Runtime: 20

Spill Prevention Control and Countermeasure (SPCC) (US)

You have seen media reports about the catastrophic effects an oil spill has on wildlife, the environment, and the livelihood of affected communities. The SPCC regulation was developed to prevent oil releases at facilities from polluting navigable waters of the United States. This course gives employees a general overview of SPCC requirements. Ideal learners are any employee involved in oil handling, transfer, storage, spill response or maintenance of oil equipment.

Format: eLearning - Claro

Libraries: **Topic/Industry:**

- Safety Catalog
- EHS for Life Science - Basics Library
- Medical Device Catalog
- Pharmaceutical Catalog

- Environmental

Course Objectives:

List the general requirements and goals of an SPCC plan;Identify the potential types and sources of oils and oil products covered by the regulations;State the steps to take in the event of a spill;Give examples of what you can do to prevent spills

Runtime: 22

- Content Suite:**
- Advanced Safety Orientation for Construction Industry (IACET CEU=0.9)
 - Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7)
 - OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored)
 - OSHA 30: Construction Outreach Training Course (IACET CEU=3.0)
 - OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored)
 - OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0)

Course Objectives:
Identify potential hazards of handling and storing materials;Recognize the methods of injury prevention;Recognize techniques to properly move, handle and store materials

Runtime: 12

Stop Signs and Signals - Large Vehicles (US)

PS5-01384

The time you save by rolling past a stop sign or blazing past a yellow or red light will never justify the potential harm you might do to yourself and to other motorists. That is the central message of this course. Ideal learners are drivers of large commercial vehicles.

Languages Available:
English

Format: eLearning - Claro

Libraries:
• Safety Catalog

Topic/Industry:
• Transportation Safety

Content Suite:
• Driver Safety Training -
Large Vehicles Suite
(IACET CEU=0.1)

Course Objectives:

Explain the consequences of failing to obey stoplights and stop signals while driving your truck;Specify how to properly stop at intersections and railroad crossings;List strategies to overcome the impulse to ignore stop signs and signals

Runtime: 10

Stop Signs and Signals - Light Commercial Vehicles (US)

PS5-01383

The time you save by rolling past a stop sign or blazing past a yellow or red light will never justify the potential harm you might do to yourself and to other motorists. That is the central message of this course.

Languages Available:
English

Format: eLearning - Claro

Libraries:
• Safety Catalog

Topic/Industry:
• Transportation Safety

Content Suite:
• Driver Safety Training -
Light Commercial
Vehicles Suite (IACET
CEU=0.1)

Course Objectives:

Explain the consequences of failing to obey stop lights and stop signals while driving your light commercial vehicle;Specify how to properly stop at intersections and railroad crossings;List strategies to overcome the impulse to ignore stop signs and signals

Runtime: 11

Stormwater and Erosion Control for Construction

PS5-01345

Runoff from rainstorms and snowmelt picks up pollutants like sediment, oil, grease and other chemicals. Contaminated runoff may flow into storm drains or it may flow directly into lakes, rivers and streams. Preventing stormwater contamination ensures clean water for swimming, fishing and drinking. U.S. Federal law requires construction sites to obtain stormwater permits any time an acre or more of land will be disturbed. As part of the permitting process, companies implement stormwater pollution prevention programs, or SWPPPs. This course covers Best Management Practices (BMPs) for stormwater and erosion control. Ideal employees are those in the construction industry.

Languages Available:
English

Format: eLearning - Claro

Libraries:
• Safety Catalog

Topic/Industry:
• Construction

Course Objectives:

Identify ways you can help control stormwater and erosion;Know specific techniques for controlling stormwater and erosion in places such as construction entrances and natural areas;Distinguish between sites with effective and ineffective stormwater and erosion control

Runtime: 10

Stormwater Pollution Prevention (US)

Laws require us to regulate stormwater in order to reduce the pollution of rivers and lakes. Identifying sources of storm water pollution and keeping them from coming in contact with runoff is one of the best and most economical ways of protecting the quality of our waters. This course presents best management practices to prevent stormwater pollution.

Format: eLearning - Claro

Libraries:

- Safety Catalog
- EHS for Life Science - Basics Library
- Medical Device Catalog
- Pharmaceutical Catalog

Topic/Industry:

- Environmental

Content Suite:

- Environmental Responsibility Suite (IACET CEU=0.3)

Course Objectives:

Define stormwater;Discuss how the regulation of stormwater has developed;List common sources of stormwater pollution;Discuss the effects of stormwater pollution on the environment;Give examples of best management practices for preventing stormwater pollution;Describe how to respond to a spill;State the fines and penalties for polluting stormwater;Describe the purpose and requirements of a Stormwater Pollution Prevention Plan

Runtime: 25

Struck By, Caught Between - Staying Out of the Line of Fire (US)

PS5-00179

According to OSHA, two of the most frequently severe types of construction incidents are being either struck by or caught in or between materials and equipment. This course focuses on the steps workers can take to stay out of the line of fire and avoid being struck by or caught in or between hazards at work, including hazard awareness, prevention and control, with an emphasis on taking personal responsibility for safety. Ideal learners are construction workers.

Languages Available:
Spanish (Latin America) (PS5-102221)

- OSHA 30: Construction
Outreach Training
Course (IACET
CEU=3.0) (Actively
Proctored)

Course Objectives:

State different types of controls to address struck-by and caught-in/caught-between hazards; Describe worker-level controls for a variety of line-of-fire hazards

Runtime: 28

Tasks and Corrective Actions

Tasks and corrective actions give you a chance to put everything you learned during inspections and observations to work so that you can improve safety. Take this course to learn about factors that should influence the corrective actions you choose and best practices you should follow. This course is intended for all industries and construction employees, including managers.

Format: eLearning - Claro

- Libraries:
- Topic/Industry:
- Safety Catalog
 - Health and Safety Management

- Content Suite:
- Why Incident Management Matters (WIMM) Suite (IACET CEU=0.3)
 - Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7)
 - Why Incident Management Matters (WIMM) Suite
 - OSHA 30: Construction Outreach Training Course (IACET CEU=3.0)
 - OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored)

Course Objectives:

Know how to structure effective hazard controls;Identify factors that should influence how you choose and implement corrective actions;Evaluate and prioritize risks;Know how to monitor and follow up about corrective actions

Runtime: 16

Towing Trailers (US)

Trailers towed by motor vehicles provide an efficient, convenient way to carry heavy loads but they present challenges to drivers. To avoid accidents, you should understand exactly how towing a trailer affects the vehicle you are driving and what you can do as a driver to stay safe as you tow your load.

Format: eLearning - Claro

- Libraries:
- Topic/Industry:
- Safety Catalog
 - Transportation Safety

Course Objectives:

General towing principles;Connecting a vehicle and trailer;Driving and parking with a trailer

Runtime: 17

PS5-00863

- Languages Available:
- English

Transportation of Dangerous Goods (Canada)

PS5-100203**Languages Available:**
English

The dangers associated with hazardous goods are magnified when people transport them since they are in motion and may be exposed to dangerous conditions. The Canadian government enacted the Transportation of Dangerous Goods (TDG) Act to promote public safety. Everyone who transports hazardous goods needs to know what they are handling, what the dangers are and what to do in case of an emergency. Take this course as an overview to TDG regulations. Ideal learners include anyone who is involved in shipping or receiving dangerous goods.

Format: eLearning - Claro**Libraries:**

- Safety Catalog

Topic/Industry:

- Transportation Safety

Course Objectives:

What are dangerous goods?;Regulations;Identification;Responsibilities;Requirements;Accidental release

Runtime: 18

Tree Trimming Safety (US)

PS5-00667**Languages Available:**
English

Tree trimming operations require climbing, pruning and felling trees. Hand and portable power tools such as loppers, trimmers and chainsaws make the necessary cuts. Aerial lifts and chippers bring workers to the right height and clean up the worksite. All of these activities have the potential to be extremely hazardous. This course covers safety precautions for tree trimming. Ideal learners are employees who participate in tree trimming operations.

Format: eLearning - Claro**Libraries:**

- Safety Catalog

Topic/Industry:

- General Safety and Manufacturing

Course Objectives:

State the common hazards of tree trimming;Describe what you can do to avoid these hazards

Runtime: 25

Trending and Analysis

You cannot continuously improve unless you constantly evaluate your performance. The best way to improve safety is to follow through on your plans and then analyze the results to see if there is room for improvement. Take this course to learn about the data you should analyze, what it can tell you and how you can follow up. Ideal learners are managers, supervisors, safety committee members.

Format: eLearning - Claro

- Libraries:
- Topic/Industry:
- Safety Catalog
 - Health and Safety Management

- Content Suite:
- Why Incident Management Matters (WIMM) Suite (IACET CEU=0.3)
 - Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7)
 - Why Incident Management Matters (WIMM) Suite

Course Objectives:

Recognize the importance of measuring the effectiveness of incident management systems;Define lagging and leading indicators;Recall best practices for following up on corrective actions

Runtime: 16

Using Electrical Safety Programs (US)

Electricity can kill. That is why NFPA 70E® was created. It requires employers to develop and implement an electrical safety program. This course explains basic electrical safety practices that apply to electrical work. These practices include wearing personal protective equipment and completing arc-flash hazard analyses. Ideal learners include people in all industries, particularly supervisors, electrical maintenance and installation workers, and safety managers.

Format: eLearning - Claro

- Libraries:
- Topic/Industry:
- Safety Catalog
 - EHS for Life Science - Basics Library
 - Medical Device Catalog
 - Pharmaceutical Catalog
 - General Safety and Manufacturing

Course Objectives:

Explain the purpose of electrical safety programs;Recognize the elements of an electrical safety program;Recall how to complete an arc-flash hazard analysis;Distinguish between arc-flash, limited and restricted approach boundaries;Identify appropriate personal protective equipment for electrical hazards

Runtime: 25

PS5-00207

Vector-Borne Disease Awareness: Mosquitoes, Ticks and Other Pests

PS5-102687

Mosquitoes, ticks and other pests are more than just an annoyance. They can carry serious diseases. Take this course to learn what environments they prefer and what you can do to protect yourself and others from them. This course is ideal for everyone, but especially people who work outdoors.

Languages Available:
Spanish (Latin America) (PS5-102919)
English

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- General Safety and Manufacturing

Content Suite:

- Working from Home Suite
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored)
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0)

Course Objectives:

Know what vector-borne diseases are and which pests may carry them;Identify environmental factors that can harbor pests;Recall ways to make the environment less hospitable to pests;Know which personal factors can reduce the risk of exposure to pests;Know why it is important to report bites and symptoms of vector-borne illnesses

Runtime: 15

Vehicle and Roadside Inspections (US)

PS5-01481

This course educates commercial big-rig truck drivers and other personnel at trucking companies about the importance of vehicle and roadside inspections. This course will provide information about the items for which drivers or enforcement officers will check during an inspection.

Languages Available:
English

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- Transportation Safety

Content Suite:

- Commercial Drivers Suite (IACET CEU=0.4)

Course Objectives:

Explain the importance of inspecting your vehicle before each day's operation;List the things that may occur during an enforcement inspection;Describe how to ensure your safety and the safety of others when you inspect your own vehicle;Identify items on a vehicle that require correction

Runtime: 9

Vehicle Inspection for Heavy Equipment (US)

PS5-01067

When driving to service calls or various worksites, you do not have time to waste with a flat tire, overheated engine or some other maintenance problem that could possibly cause a motor vehicle incident. That is why it is essential to maintain your work vehicle and perform pre-trip inspections. Inspections help you identify and address problems before getting on the road. And ultimately, they help save you and your company time and money.

Languages Available:
English

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- Construction

Course Objectives:

Understand the importance of vehicle inspections; Recall the steps to inspecting your vehicle; Identify what to look for during an inspection

Runtime: 18

Walking/Working Surfaces

Slips, trips and falls remain one of the most common causes of employee injury in the workplace. Understanding the actions you can take to prevent these incidents will help keep you and your co-workers safe and productive. This course provides a clear understanding of general guidelines for staying safe on walking and working surfaces. Ideal learners are all employees.

Course Objectives:
Identify safe material handling and storage procedures;Recall safe lifting techniques;Understand how to work safely around loading docks and conveyors;Recognize correct vehicle and equipment use protocols;Name emergency prevention and preparation steps;List routines for maintaining a safe warehouse

Runtime: 13

Welding, Cutting and Brazing

PS5-01400

Welding, cutting, brazing and other hot work are common, and inherently dangerous, activities on many jobsites. Care must be taken to ensure that work is performed safely. This course introduces common hazards associated with welding, cutting and brazing and ways to prevent injury and damage. Ideal learners are workers who perform welding, cutting and brazing.

Languages Available:
Portuguese (Brazil) (PS5-102010)
Spanish (Latin America) (PS5-01027)
English

Format: eLearning - Claro

- Libraries:**
 - Safety Catalog
 - EHS for Life Science - Basics Library
 - Medical Device Catalog
 - Pharmaceutical Catalog
- Topic/Industry:**
 - General Safety and Manufacturing

Course Objectives:
Describe the roles of personnel involved in welding, cutting, brazing and other hot work operations;Recognize how the hot work permit system ensures that all hazards are identified, communicated and controlled;Identify fire prevention techniques used during welding, cutting and brazing;Understand hazards associated with oxyacetylene and arc welding and methods to mitigate risks;Recall the proper storage, handling, transportation and use of compressed gas cylinders;Be aware of the chemical and physical agents produced in welding operations;Identify personal protective equipment (PPE) to be worn

Runtime: 38

Welding, Cutting and Brazing Awareness

PS5-102597

Languages Available:
English

Workers must take steps to prevent injury and damage when welding, cutting and brazing. The risk from fatal injuries alone is more than four deaths per thousand workers over a working lifetime. Therefore, care must be taken to ensure that work is performed safely. This course introduces common hazards associated with welding, cutting, and brazing and ways to prevent injury and damage. Ideal learners are employees who perform hot work.

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- Awareness
- General Safety and Manufacturing

Course Objectives:

Identify fire prevention techniques used during welding, cutting and brazing;Recognize hazards associated with oxyacetylene and arc welding and methods to prevent these hazards;Recall the proper handling, transportation, use and storage of compressed gas cylinders;Identify personal protective equipment (PPE) to be worn when performing hot work operations

Runtime: 10

Welding, Cutting and Brazing for Construction: Health Concerns

PS5-102728

Languages Available:
Spanish (Latin America) (PS5-102887)
English

It is not surprising that welding, cutting, brazing and other hot work can cause fires, burns or explosions. But did you know that hot work also has health hazards associated with welding fumes and light exposure? Take this course to find out about chemical, radiation and light hazards and how to control them. Ideal learners are workers who perform welding, cutting and brazing in construction settings.

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- Construction

Content Suite:

- Welding, Cutting and Brazing for Construction, Parts 1-3
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored)

Course Objectives:

Recognize the hazards in welding fumes that may be present during hot work;Recall ways to control hazards including ventilation, personal protective equipment and body protection;Know what radiation and light hazards are for hot work

Runtime: 12

Welding, Cutting and Brazing for Construction: Methods

PS5-102729

Different types of welding, cutting and brazing methods have different safety considerations. Take this course to learn about these considerations. Ideal learners are workers who perform welding, cutting and brazing in construction settings.

Languages Available:

Spanish (Latin America) (PS5-102883)

English

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

Work Zone Safety (US)

PS5-00778

The objective of this course is to help you understand the dangers associated with highway and road construction, as well as how to protect yourself. With the number of traffic fatalities in highway work zones rising, it is imperative workers understand the unique problems associated with working with live traffic.

Workplace Hazardous Materials Information System (WHMIS) Part 1: What Is WHMIS?

PS5-100308

The Workplace Hazardous Materials Information System (WHMIS) makes chemical information uniformly available to all Canadian workers. This course explains how WHMIS works, who is responsible for various tasks under WHMIS, and how everyone can take full advantage of the hazardous material information available to them. Ideal learners are all employees.

Recall how WHMIS works;Specify your rights and responsibilities under WHMIS;Identify the responsibilities of suppliers and employers under WHMIS

Runtime: 20

Workplace Hazardous Materials Information System (WHMIS) Part 2: How WHMIS Works

PS5-100358

The Workplace Hazardous Materials Information System (WHMIS) makes hazardous material information uniformly available to all Canadian workers. Given the amount of information and number of parties involved, this can be a complex undertaking. This course explains how WHMIS works, how the Globally Harmonized System of Classification and Labelling (GHS) is aligned with WHMIS, who is responsible for various tasks under WHMIS, and how everyone can take full advantage of the hazardous material information available to them. This course covers the most recent WHMIS 2015 regulations. Ideal learners are all employees.
